

Graham Lester

Paper art and turned art

I have worked with paper as a medium for many years and have been commissioned to produce paper sculptures for various promotions.

I now focus on using the medium to express my own creative ideas, I like the clear crisp graphic effect that can be achieved with paper.

I also produce turned art using a variety of recycled materials including paper, acrylics and Corian, bonded together and turned on the lathe into decorative bowls and pots.

I find it satisfying to create something beautiful from thrown away materials.
