BODY MEASUREMENTS - IMPERIAL & METRIC					
	OSM	OS	OSP	OSP2	OSP3
CHEST					
inches	29-33	33-38	38-45	45-52	52-58
centimeters	74-81	81-95	95-109	109-128	128-147
WAIST					
inches	23-27	27-32	32-39	39-46	46-52
centimeters	58-66	66-80	80-94	94-112	112-131
HIP					
inches	33-37	37-42	42-49	49-56	56-62
centimeters	84-91	91-105	105-119	119-137	137-156

Body Measurements

Start by taking your body measurements. Measure the circumference of your waist and hips by pulling the measuring tape snug but not too tight. Measure directly over bare skin or typical-for-you undergarments. It should fit tightly around your skin but not so tight that it digs in. Try to keep the tape parallel with the floor, and make sure it is not twisted. Compare your measurements to the “body” measurements in the chart above to see what size is recommended for you.

If your measurements fall between sizes or place you in multiple sizes, I recommend choosing the larger size. Altering down is easier than sizing up. For the Georgia pattern, the bust and hip measurements are the most important factor. Use the “garment” measurements (next page) to further aid in your size selection.

SELECTING YOUR SIZE

GARMENT MEASUREMENTS - IMPERIAL (in)					
	OSM	OS	OSP	OSP2	OSP3
SLEEVE OPENING	15¼	17	19¼	21¼	23¼
NECK WIDTH	9	9¾	9¾	10	10¼

tee	107	120	133	147	162.5
dress	111	125	140	152.5	165
midi	112	125	140.5	158	168

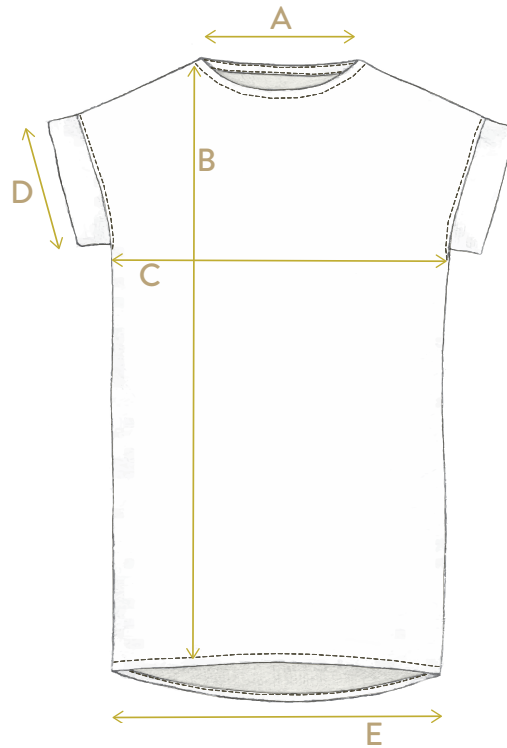

Garment Measurements

The garment measurements refer to the finished dimensions of the garment and will of course differ from your body measurements. All garments have ease, and for a comfortable fit in woven materials, most of our patterns have several inches of positive ease (meaning the finished garment measurements will be several inches larger than the corresponding body measurement). Every body is different, and no single style or pattern will fit everyone correctly right off the bat. The best way to ensure a good fit is to make a toile or muslin of the pattern to finalize your size selection and make any fit adjustments. See the diagram on the next page for more details on how garment measurements are taken.

SELECTING YOUR SIZE

Garment Measurements, ctd.

The diagram below illustrates where all garment measurements for the Georgia Series are taken on a finished garment.

- A** *Neck Width*
Measured flat, from one high shoulder point to the other
- B** *Length*
Measured flat, from high shoulder point to the lowest point on the front / back of the garment
- C** *Chest*
Measured in the round, 1" (2.5 cm) below the bottom of the armhole
- D** *Sleeve Opening*
Measured in the round, along the edge of sleeve cuff
- E** *Sweep*
Measured in the round, along the hem of the garment
