# Klenz ID® Rids Carboxylates in IDID Diesel fuel

PRIMROSE SINCE 1916

Solutions at Www.ASIproducts.com

Quickly clean up carboxylates in today's diesel IDID engines with Klenz ID®

These photos are what Klenz ID® can take care of in today's diesel fuel. Klenz ID® can be used as a preventative to carboxylate phenomenon's when used at the quick clean or keep clean treat rate. As shown in the bottom right picture, Klenz ID® may be used as a fast clean-up of carboxylates, when used at the quick clean treat rate.

Carboxylates / sticky IDID is also known in the field as 'carboxylate corrosion,' and may be found in different colors like white, brown, orange, pink, etc.

## Klenz ID is available in the following sizes:

1-Quart Bottles

1-Gallon Bottles

2.5 Gallon Jugs

5 Gallon Container

55 Gallon Drum

275 Gallon Tote

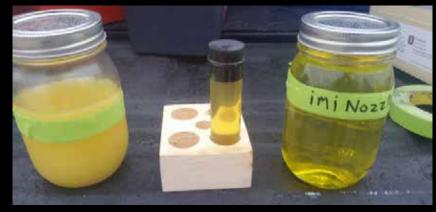

This is not a 'gelled up' filter, it is carboxylates / sticky IDID.

Corroding filter housing caused by carboxylates / sticky IDID.

Pictured is pink tinted carboxylates / sticky IDID.

Left side: Carboxylates in diesel fuel. Right side: Klenz ID®, at quick clean dose, took care of the carboxylates and cleared up the diesel fuel.
