COMFORT

The HAREX Urinary Ring is made with sanitary-grade lightweight high quality plastics, technologically tested to avoid liquid absorption. The Device measurements are 48 x 54 x 18 mm so in addition to being safe, it is small in size and is very comfortable. Once in place neither you nor anyone else will notice that you are wearing it. The HAREX Device is fully adjustable, you just have to move the adjustment lever to adapt it to the pressure required.

ALLOWS BLOOD FLOW

The device does not press on the sides of the penis and therefore can be for several hours, however it is recommended to remove the HAREX Device at night while sleeping, to rest the penis. During the time spent lying down a protection mat can be used instead. If it is necessary to use the Device during the time you are lying down, loosen the strap with a lighter pressure than you would use during the day.

BOX FOR STORING DEVICE

The set contains a box for transporting and / or storing the device. It is made of plastic so it can be washed hygienically if required.

EASY CLEANING

The Device is easily cleaned by hand with warm water and soap. It is manufactured entirely in sanitary-grade plastic material. Given that HAREX has no metallic elements, it can pass without problem through metal detection systems, such as those used at airports, train stations, etc.

HELPFUL TIPS

If the natural urge to empty the bladder is not perceived, it is advisable to release the Device every 2 or 3 hours to avoid excessive filling of the bladder.

Placing the urethral cushion: When placing the device, make sure that the pressure cushion is in the correct position pressing on the urethra, and that it is not misplaced. This way the urethra will remain completely obstructed to avoid urine leakage.

Circumcised patients: Use the Device directly behind the head of the penis. If you are a little overweight, or are not circumcised, before placing the Device pull back the foreskin as this will prevent the Device from moving due to the pressure at the base of the penis.

Belt numbering: the adjustment belt has measurements added so that you have your own personal reference for the perfect fit. This way you can place the device at the optimum position for you.

PLACEMENT OF THE DEVICE

- Move the belt adjustment lever (B) down and loosen the belt.
- Insert the penis into the Device.
- Adjust the belt (C) to the contour of the penis.
- Move the lever (B) up to fix the strap (C).
- Move the pressure activator (A) up, to block the urethra.

Keep the genital area clean to avoid irritation.

If you are aware that the Device is misplaced by either uncomfortable pressure or mild pain, it is a sign that the Device is too tight. Loosen the belt a little. Check that there are no folds in the skin of the penis as this could cause discomfort. With the right fit it should feel comfortable.

DEVICE REMOVAL

- Move the pressure activator downwards (A)
- Release the adjustment lever (B) and loosen the belt so that there is enough space to remove the penis from the Device.

TO URINATE

- Move the urethra pressure activator (A) downwards. The device will release the pressure and you can start to urinate.
- Once finished, release the belt and move the pressure activator (A) to the initial position.

The belt is designed to fit over the penis by applying light pressure on the urethra to stop the flow of urine. In case of incorrect placement, it may cause pain, be sure to follow the instructions indicated.

If in doubt, please call us or send us an email and we will be happy to help you. We have the answers to all your questions.

TERMS AND CONDITIONS

You are using the Device at your own risk and responsibility. If you have a medical problem other than incontinence, consult your doctor before using the Device. If you experience problems you should stop using it immediately and notify your doctor.

DEVICE PLACEMENT COLOCACIÓN DEL DISPOSITIVO

Initial setup.

1 Move the lever down.
Loosen the belt.

2 Introduce the penis
into the Device.

3 Adjust the belt to the
contour of the penis.

4 Move the lever up
to fix the strap.

5 Move the pressure
activator up.

DEVICE REMOVAL RETRÍDA DEL DISPOSITIVO

6 Move the pressure
activator down.

Pacientes circuncidados: Utilice el Dispositivo directamente detrás de la cabeza del pene. Si usted tiene un poco de sobrepeso, o no está circuncidado, antes de colocar el Dispositivo retire hacia atrás el prepucio, ya que esto evitará que el Dispositivo se mueva debido a la presión en la base del pene.

Numeración correa: La correa de ajuste, dispone de una regla numérica para que usted tenga una referencia de cuál es su ajuste perfecto y pueda colocar el Dispositivo en su posición óptima.

COLOCACIÓN DEL DISPOSITIVO

- Mueva la palanca de ajuste del cinturón (B) hacia abajo y afloje la correa.
- Introduzca el pene en el Dispositivo.
- Ajuste la correa (C) al contorno del pene.
- Mueva la palanca (B) hacia arriba para bloquear la correa (C).
- Mueva el activador de presión (A) hacia arriba, para obstruir la uretra.

Mantenga limpia la zona genital para evitar irritaciones. Si se da cuenta de que el Dispositivo está mal colocado por una presión incómoda o un dolor leve, es señal de que el Dispositivo está demasiado apretado. Afloje la correa y compruebe que no hay pliegues en la piel del pene, ya que esto le podría causar molestias. Con el ajuste adecuado se sentirá cómodo.

RETIRADA DEL DISPOSITIVO

- Mueva el activador de presión hacia abajo (A)
- Libere la palanca de ajuste (B) y afloje la correa para que haya espacio suficiente para retirar el pene del Dispositivo.

PARA ORINAR

- Mueva el activador de presión de la uretra (A) hacia abajo. El Dispositivo dejará de hacer presión y podrá iniciar la micción.
- Una vez que haya terminado, suelte el cinturón y mueva el activador de presión (A) a la posición inicial.

La correa está diseñada y se ajusta sobre el pene aplicando presión en la uretra para detener el flujo de orina. En caso de una incorrecta colocación, puede ocasionar dolor, para evitarlo, asegúrese de seguir las instrucciones indicadas. En caso de duda, por favor llámenos o envíenos un correo electrónico y estaremos encantados de poder ayudarle, tenemos respuestas a sus preguntas.

TÉRMINOS Y CONDICIONES

Usted está utilizando el Dispositivo bajo su propia responsabilidad y riesgo. Si tiene un problema médico distinto de la incontinencia, consulte a su médico antes de utilizar el Dispositivo.

Si experimenta problemas, debe dejar de usarlo inmediatamente e informe a su médico.

GARANTÍA

La garantía del fabricante contra defectos y roturas es válida durante 1 año a partir de la fecha de compra. Las reclamaciones de garantía deben ser aprobadas previamente.

La factura de compra será necesaria para cualquier tipo de reclamación.

Para mayor información le invitamos a que nos visite nuestra página web en: www.harex.net

Se recomienda reemplazar el Dispositivo después de 12 meses de uso.
