

### MEASURING YOUR WRIST.

1. Print the sizing guide on a standard letter-sized paper. Place a standard credit card along the gridded section of the sizing guide to verify the sizing is accurate.
2. Carefully cut out the printed ruler and wrap it around your wrist. Ensure the patterned section overlaps the measurements on the ruler. Adjust the ruler's position for a comfortable fit that is snug but not too tight or loose.
3. Look at the measurement value where the patterned section overlaps. This value represents your wrist size, which you can use for choosing appropriately sized bracelets or wrist accessories.
