

# PLANT TULIP BULBS

IN 6 EASY STEPS

Plant your bloomed tulip bulb in soil and watch it bloom all season long! After the leaves have turned yellow and died back prepare your bulb by following these steps:

1

1. Lift bulbs gently from the soil after leaves turn yellow.

2

2. Trim stem and brush off soil.

3

Wait For It...

3. Dry bulbs in dry, dark spot at room temp for 1+ weeks.

4

4. After it's dry, peel the skin and trim roots.

5

5. Store bulbs in cool, dry place with airflow.

6

6. Plant your bulbs around Mother's Day! Blooms emerge in Sept-Nov.

Happy Planting!
