

# DINOMAZING FUN FACTS

## BRACHIOSAURUS

The Brachiosaurus could span up to 85 feet long from head to tail.

It is one of the most popular movie dinosaurs.

## VELOCIRAPTOR

The Velociraptor had hollow bones like a bird, making it fast and lightweight.

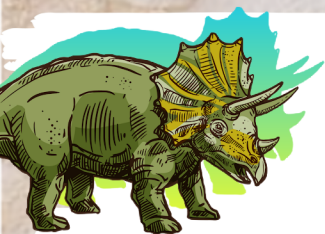

Unlike in the movies, Velociraptors were only about the size of a big chicken.

## UTAHRAPTOR

The Utahrapator is the largest raptor yet discovered. About 25 feet from head to tail.

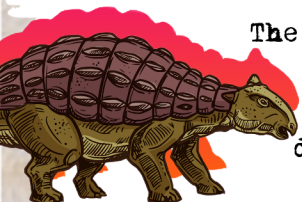

The claws on their hind feet were almost a foot long.

## TRICERATOPS

The name Triceratops means three-horned face.

They had an enormous skull that was one-third of its body.

## ANKYLOSAURUS

The top speed of an Ankylosaurus was only up to 6 miles per hour.

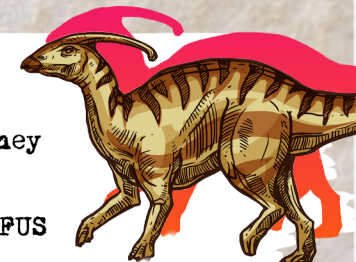

Ankylosaurus had many protective and defensive features which lead it to being called "a living tank".

## TYRANNOSAURUS REX

The name Tyrannosaurus Rex means Tyrant Lizard

The largest T. Rex tooth found is 12 inches long

## PARASAUROLOPHUS

Parasaurolophus had large head crests they used for trumpeting.

You pronounce their name PARA-SAW-ROL-OFUS

## SPINOSAURUS

The Spinosaurus was the largest carnivorous dinosaur.

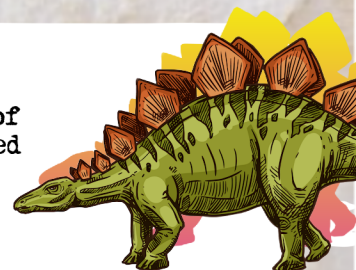

They weighed up to 20 tons which is about 3 elephants!

## PTERODACTYL

The Pterodactyl had an elongated beak with about 90 razor sharp teeth.

A young Pterodactyl is called a flapping.

## STEGOSAURUS

The Stegosaurus had brains the size of ping pong balls and are often referred to as the dumbest dinosaur.

Their name means roofed lizard.
