- Seamless, continuous illumination.
- Flexible silicone body that acts as a diffuser lens.
- Available in 5m Reels (840 LEDs), or cut to size.
- Higher chip density, provides greater brightness, flexibility and evenness of light output at an economical price point.
- Wide 180 degree beam angle for full coverage illumination.
- Greater color options with RGB tricolor color mixing.
- Continuous lighting effect ensures minimal hotspots.
- High density LEDs provides continuous light output even in shallow mounting locations.
- No aluminum profile/lens needed to create a continuous line of light.
- Field cuttable.
- Designed with quick-disconnect barrel connectors for easy installation and are provided with peel & stick 3M self-adhesive backing for easy mounting.
- COB lighting is brighter than other similar lighting fixtures because COB LED chips are smaller in size as a result of being directly bonded onto the flexible printed circuit board. With the smaller size, more LED chips can be closely packed together to provide brighter, more uniform lighting.
