Sunscreen

TRUE. by **lanaiou**

Ingredient	What it does	Rating
Aqua	Good old water, aka H2O. Used as a solvent for ingredients.	😊
Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine	One of the best sunscreen agents known today	Goodie
Titanium Dioxide	One of the two members of the exclusive sunscreen category known as physical sunscreens (or inorganic sunscreens for those who prefer precise scientific terminology).	Goodie
Zinc Oxide	Zinc Oxide reigns supreme among sunscreen agents. As a physical (or inorganic) sunscreen, it outshines Titanium Dioxide (TiO2) in several ways, claiming superiority.	Goodie
C15-19 Alkane	An emollient that gently softens and smoothes the skin, offering a lightweight feel. It has gained popularity as a substitute for silicones.	😊
Cetearyl Alcohol	A multitasking ingredient that softens the skin (emollient) and enhances the texture of creams and lotions.	😊
Caprylic/Capric Triglyceride	Derived from coconut oil and glycerin, this non-greasy ingredient is lightweight, clear, odorless, and universally well-tolerated by all skin types.	😊
Chamomilla Recutita (Matricaria) Flower Extract	Soothing antioxidant, mainly used for its anti-inflammatory properties.	Goodie
Aloe Barbadensis Leaf (Aloe Vera) Extract	A magic plant! The extract coming from the juice of the Aloe vera plant. Has moisturizing, emollient and anti-inflammatory properties as the juice itself.	Goodie
Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer	A versatile ingredient that emulsifies and stabilizes oils in water-based formulas. It also thickens and creates non-sticky, supple textures.	😊
Glycerin	A natural moisturizer found in our skin, this molecule has been widely used for over 50 years due to its commonality, safety, effectiveness, and affordability.	Superstar
Caprylyl/Capryl Glucoside	Facilitates the even and effortless spreading of the product.	😊
Polyacrylate Crosspolymer-6	A versatile ingredient that thickens formulas, creating a smooth gel texture. It leaves a rich, velvety feel on the skin and works well in various pH ranges.	😊
Sodium Benzoate	A preservative that prolongs product freshness, primarily targeting fungi.	😊
Potassium Sorbate	A preservative that specifically targets mold and yeast, ensuring the longevity of cosmetics.	😊
A-Tocopherol	Key fat-soluble antioxidant in our skin, providing significant UVB photoprotection.	Goodie
