Nelson's Economical Line of Carts for Catering, Concessions, Party Rental, and Special Events.

A perfect choice for professionals and upstart companies for ice cream or Italian ice dipping anytime, anywhere

CLT's!

These carts deliver the performance of standard Nelson carts in a compact, lightweight and inexpensive package. Ideal for the smaller catering jobs where a less durable piece of equipment is required. This line is also available with no refrigeration, great for use with Italian Ice or for use with dry ice. Nelson, the best value, the best deals and the lowest online prices.

Umbrella Bracket
Push Bar
Lid Lock

Standard features of the CLT series of carts:

- Heavy gage, welded aluminum frame which protects the exterior and top of the cart from collisions.
- Nelson exclusive digital temperature control for precise setting of any temperature, -30 degrees to +30 degree, with no change in thermostat.
- Temperature setting repeatability- easily set for Italian ices or ice cream, novelties or scooping, or colder temperatures for ice cream beads with ease.
- Soft, resilient 6" rubber wheels standard, 8" available at no extra cost. These are the best outdoor cart wheels in the industry.

MADE IN THE U.S.A.

- Stainless steel interior for excellent corrosion protection and durability.
- Stainless steel top with welded corners, no rough edges anywhere. Rust-proof exterior. No painted steel anywhere.
- Replaceable, dent-resistant exterior. Your choice of either inexpensive decals mounted on plastic panels or more durable, back-printed lexan graphics (the ultimate in cart and graphics protection). Graphics easily changed with a screwdriver.
- Air-cooled compressor system with clog-free condenser. Outdoor summer temperatures in the 90's? No problem.
- Thicker, (up to 25% more) insulation than imported bunker freezers used by other cart makers. More insulation will hold frozen product longer without cold plates. More insulation makes a more energy efficient cart and helps the cart work better in high, outdoor summer temperatures.
- Poured-in-place urethane foam makes a more rigid structure, allowing for lightweight construction.
- Ideal for people who rent or send carts out for different functions with different products.
- Options include: Baskets or Can Skirts, Sneeze Guards, Canopies
