

DROP-IN CABINET

The Global DI-4 drop -in cabinet is designed for storing chilled dishes, mugs , ice cream storage and medical applications.

Forced convection condenser unit permits air intake and exhaust through front even when installed on a raised solid base. Bare-tube design makes it easy to keep clean.

The cabinet is designed to fit below standard 34 inch countertop and installs in 30 inch deep backbar or counter.

All products are certified for energy , safety and sanitation. NSF/ ANSI 7 Standards
