

New Product Announcement

Setting The Standard. **Again.**

INTRODUCING THE NEW
**2GIG GC3
Premium Panel**

**The 2GIG GC3 Platform is
Available for Pre-Order!**

Nortek Security & Control is happy to announce that the new **2GIG GC3 Security & Home Control Platform** is now available for pre-orders. ***The 2GIG GC3 is the most capable and robust security & home control system that Nortek Security & Control has ever made.***

GC3: Completely Redesigned

The 2GIG GC3 is a highly-intuitive 7" all-in-one security and home control touchscreen panel that provides home security, manages up to 232 smart home devices, features robust zone and user customization options, affords mobile security and safety alerts, and brings unprecedented update capabilities that allow dealers to manage their customers' systems easily and efficiently.

Dealers will love how much faster this panel installs and configures, too, with quicker access to frequently-used programming steps, and a design that makes everything faster, whether it's an upgrade or new installation. Our beta testers say it's the quickest panel on the market to install and program (and they estimated GC3 to be up to 30% faster to install than our already-quick GC2 system).

Homeowners will also love how GC3 brings smart home features right where they should be, with the ability to create a custom home screen using the 'bookmark' feature, and the 'rooms' feature for grouping smart home devices.

Features:

- Big, easy-to-read 7" color high resolution capacitive touchscreen
- 800 x 480 pixel resolution
- Super-soft touch action, just like your cell phone or tablet
- Easy-to-see status
- On-screen date-time, weather & severe weather alerts*
- One-touch arming
- Integrated bubble level in the mounting case, plus the 'third hand' holder strap installers love
- 100 wireless zones, 100 unique user codes
- Will accommodate up to 32 keyfobs and up to 4 additional remote keypads
- Integrated CellSled for quick and easy installation
- Over-the-Air (OTA) update* capability
- Remote control capability* for security and home automation devices with internet-connected mobile devices
