

THIS IS NO ORDINARY FIRE BLANKET

SB Series

**A protection and
containment solution
for lithium battery fires**

Fire blanket shown in open position

Fire blanket shown in closed position

LiCELL™ offers a range of specialized fire blankets designed specifically for the lithium battery market. These blankets are capable of withstanding extremely high temperatures for a prolonged period of time, as well as being robust enough to offer protection against potential debris and shrapnel expelled during a battery fire event. They are easy to store and easy to deploy.

Organizations connected to the production, storage, or transportation of lithium batteries and devices need a thorough fire prevention and suppression strategy. Fire blankets are an important part of a comprehensive fire protection plan.
