THE SOFT EQUIPET WITH 3 COMPARTMENTS Created and adapted for various uses whether you are on a sailboat, a semi-rigid, a fishing trip or quite simply in a trunk.

PRACTICAL 2

flap pockets on the upper part and a long pocket without gusset on the lower part allowing you to store all kinds of equipment (rope, fins, gaff, oar, fishing equipment, etc.).

Easily removable, thanks to its attachment system by mushroom or by lashing using the available buckles. The flexible rack can follow you wherever you go with all your equipment, ready to serve.

MODULAR Line up

several and easily modulate your storage.

Once connected, the semi-open pockets at the bottom will allow you to store longer equipment.

Reference : TM804010,3C,2RB

Dimensions : L80 x H40 X ep10cm

Dimension of the 2 closed pockets: L35xH15xep10cm

Dimensions of the long pocket: L74xH15xep10cm

Weight: 1.3 KG **Colours:** Black

Fittings: body reinforced with straps with fastening buckles, 2 pockets with exterior bandolier, flap and adjustable clasp, 1 long pocket with opening by adjustable bungee cord (and/or removable if modulated) in the lower part, the upper part of the pockets has rods to give more rigidity and ease of opening, possibility of coupling several shelves with joining of the bottom pockets, if necessary.

Materials: body and pockets in 2-sided PVC-coated polyester, bottom of the pockets in 2-sided PVC-coated openwork polyester, reinforcements in polypropylene strap (BLACK), adjustable plastic clasp buckle.

The flexible team

3 compartments, Modular

Organized storage, protected equipment

- 1 The 2 top pockets with flap close with an adjustable clasp. The contents are thus protected from spray.
- 2 The mesh fabric below the pockets prevents water stagnation.
- 3 A 2-piece bandolier on the front of the pocket can store pliers, knives and various tools if needed.
- 4 The long bottom pocket, without flap or gusset, makes it quick and easy to store long items. At each end you will find (removable if necessary) an adjustable bungee cord with a pickup and a strap with an adjustable clasp in the middle to compress everything.

Practical fixing systems

- 6 Loops allow you to attach either by transfilling using a padeye or trigger guard (not supplied), or as a sheath by passing your lifelines, semi-rigid lifeline, or even both.
- 7 These loops are arranged all around the periphery of the rack, 5 at the top, 3 at the bottom and one in the middle of the sides.
- 7 For flat or even curved surfaces, the quick fastening system with mushrooms will also allow you to set it up quickly.

Adapts to your boat, your need

Whether on a sailboat, a semi-rigid, a fishing trip, leisure or simply in a trunk, this flexible rack will follow you

everywhere.
