LOCATION: Ft Lauderdale, Florida

JOB TITLE: Software Engineer

BASIC QUALIFICATION: Bachelor's degree in Software Engineering

YEARS OF EXPERIENCE: 3-5+ years of experience

VSN Mobil is looking for passionate software engineers to drive software solutions into cutting edge wireless and electronic products. This job requires both hands on development skills as well as the ability to successfully manage supplier software development. The candidate must be able to work in a small team environment and be willing to work on a variety of projects simultaneously.

Key Qualifications:

- Strong Android development skillset in both application and OS framework level
- Good knowledge of a wide variety of mobile OS technologies like iOS, Linux, Android and Windows
- Experience in developing with wireless technologies like Bluetooth, WiFi, GPS, and LTE.
- Good knowledge of web technologies and web service development

Key Technical Knowledge:

- Experience with programming language such as Java, Objective C, Java Scrip, HTML, PHP
- Understanding of general programming/debugging tools such as adb, gdb and IDE such as Eclipse, Xcode
- Understanding of test methodologies and techniques
- Understanding of source control systems such as GIT, SVN or similar systems
- Understanding of web server technologies like CMS, Amazon web service, database management systems
- Understanding of hardware and embedded software would be a significant benefit.

VSN Mobil is an equal opportunity employer. We evaluate qualified applicants without regard to race, color, religion, sex, national origin, disability, veteran status, and other protected characteristics.

Successful applicants must be eligible to work in the United States.
