

Lithofin KF Tile Polish

Description

A special product from the LITHOFIN-Range for ceramic and quarry tiles (KF). The water based acrylate sealant can be diluted with water and is easy to use.

Properties

Once dry, Lithofin KF Tile Polish forms a film that gives dull, matt and rough surfaces an elegant sheen. Dirt will no longer penetrate into the surface and can easily be wiped away. Rough surfaces become smoother and therefore easier to maintain. The film protects the surface, while at the same time enhancing its appearance by slightly darkening the colours. Existing marks of wear and tear are masked and become less visible.

Technical Data:

Density: approx. 1.0 g/cm³ pH-Value: approx. 9 Appearance: milky-white Odour: nearly odourless

Field of Use

Lithofin KF Tile Polish has been specifically developed for unglazed ceramic surfaces, such as quarry and clay tiles. The surface film enhances the appearance and facilitates maintenance. Lithofin KF Tile Polish is not recommended for outdoor areas or for surfaces subject to heavy wear and tear. Not suitable for glazed and polished tiles.

Directions for Use

The surface must be clean and completely dried out. Pre-treating the surface with Lithofin KF Stain-Stop is recommended.

Remove dirt deposits and old care product residues with the suitable LITHOFIN cleaner.

Evenly apply Lithofin KF Tile Polish in undiluted form using an applicator, sponge or lint free cloth.

The product may be used diluted with water, if the surface is not very absorbent.

The amount of product to be applied depends on the absorbency of the tile; make sure you leave a clearly visible film of moisture on the surface. A second coat can be applied, if needed. Always test in an inconspicuous area prior to use.

<u>Drying Time:</u> surface will be dry after approx. 40 to 60 minutes, depending on temperature and humidity. <u>Coverage:</u> approx. 15 to 20m² per litre depending on surface.

Further Care

Occasionally add Lithofin KF Tile Polish to the cleaning water (one cup per ten litres) to touch up and maintain the protective film.

Storage

Closed and cool, frost free. Shelf life of up to 3 years.

Environmental Protection

Biologically degradable according to EU-regulations. Does not contain any phosphates.

<u>Disposal:</u> waste code according to EWC/AVV 07 01 99. Bottles/canisters are mode of environmentally friendly polyethylene and can be recycled (see information on label).

Safety

Keep out of reach of children. No health concerns once dry.

UFI: RH20-U0SM-3009-0SRD

<u>Ingredients:</u> waxes, acrylates, polymers, auxiliary agents.

Labelling according to EU-Directive 1272/2008(CLP):

--

ADR 2019: labelling for transport		
Unit	Label	Notes on freight papers
a) b)		none

Packaging

- a) 1 litre bottle with child-proof cap (10 per box)
- **b)** 5 litre canister (2 per box)

Please Note: statements concerning environmental and safety issues refe to the product as delivered (concentrated).

This information should be considered to be informal and non-binding. The products must be used according to local conditions and materials. Always test the product in an inconspicuous area. (GB7.19gps/--)
