### DOUBLE INSULATION INSTRUCTIONS

This Wet/Dry Vacuum is double insulated, eliminating the need for a separate grounding system. Use only identical replacement parts. Read the instructions for Servicing Double-Insulated Wet/Dry Vacuums before servicing. Use this vacuum as described in this manual. Observe the following warnings that appear on the motor housing of your vacuum.

**DOUBLE INSULATED—Grounding not required—When servicing use only identical replacement parts.**

**WARNING:** To reduce the risk of electric shock—Do not expose to rain. Store indoors.

**WARNING:** For your own safety, read and understand the operator's manual. Do not run unattended. Do not pick up hot ashes, coals, toxic, flammable, or other hazardous materials. Do not use around explosive liquids or vapors.

**CAUTION:** Do not vacuum drywall dust, fireplace soot, or ash with standard wet/dry filter. This type of dust is very fine which may not be captured by the filter and cause damage to motor.

**WARNING:** Servicing of double-insulated wet/dry vacuum—With a double-insulated wet/dry vacuum, two systems of

insulation are provided instead of grounding. No grounding means is provided on a double-insulated appliance, nor should a means for grounding be added. Servicing a double insulated wet/dry vacuum requires extreme care and knowledge of the system and should be done only by qualified service personnel. Replacement parts for a double-insulated wet/dry vacuum must be identical to the parts they replace. Your double-insulated wet/dry vac is marked with the words 'DOUBLE INSULATED' and the symbol  (square within a square) may also be marked on the appliance.

2. Undo the latches.

3. Lift the power head off the collection tank.

4. Remove the contents from inside the collection tank. Make sure you have all contents.

5. Turn the collection tank upside down and insert the four casters into the slots on the bottom of the collection tank. Ensure each caster is aligned straight into the collection tank and apply pressure until the casters snap into place.

6. Insert the handle into the slots located on the top of the power head and secure it with the screws provided. Do not over-tighten the screws.

7. Your vacuum comes ready for dry vacuum cleaning. If the reusable cloth filter is not installed.

8. For wet vacuum cleaning, remove the reusable cloth filter, and install the supplied foam wet filter. Refer to the foam wet filter installation instructions.

#### NOISE DIFFUSER

For quiet operation, install the noise diffuser into the blower port by inserting the locking end of the diffuser into the blower port and turning clockwise to lock into place.

#### POLARIZED PLUG

To reduce the risk of electrical shock, this appliance has a polarized plug (one blade wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way. Double insulation eliminates the need for the three-wire grounded power cord and grounded power supply system.

## DRY VACUUM OPERATION

### DRY VACUUMING

**WARNING:** BE SURE TO READ, UNDERSTAND, AND APPLY INFORMATION ENTITLED "IMPORTANT SAFETY INSTRUCTIONS". DO NOT VACUUM IN AREAS WITH FLAMMABLE GASES, VAPORS, OR EXPLOSIVE DUSTS IN THE AIR. **WARNING:** DO NOT PLUG THE POWER CORD INTO A POWER OUTLET. MAKE SURE THE PLUG IS DISCONNECTED BEFORE CHANGING THE FILTERS.

**CAUTION:** DO NOT VACUUM DRYWALL DUST, OR FIREPLACE SOOT, OR ASH WITH STANDARD WET/DRY FILTER. THIS IS A VERY FINE DUST WHICH WILL NOT BE CAPTURED BY THE FILTER AND MAY CAUSE DAMAGE TO MOTOR. WHEN VACUUMING FINE DUST USE A FINE DUST FILTER (SOLD SEPARATELY).

**IMPORTANT:** When vacuuming large quantities of liquids, do not immerse the nozzle completely in the liquid; leave a gap at the tip of the nozzle opening to allow air inflow. The machine is fitted with a float valve that stops the suction action when the collection tank reaches its maximum capacity. You will notice an increase in motor speed. When this happens, turn off the machine,

disconnect from power supply, and empty the liquid into a suitable receptacle or drain. To continue vacuuming, refit the power head to the collection tank. After wet vacuuming, turn the machine off and remove plug from power supply. Empty the collection tank, clean, and dry the inside and outside before storage.

**REMEMBER:** The foam wet filter must be removed after wet vacuuming and the reusable cloth filter must be installed before dry vacuuming again.

## MAINTENANCE

### EMPTYING THE COLLECTION TANK

**WARNING:** ALWAYS DISCONNECT THE PLUG FROM THE POWER OUTLET BEFORE REMOVING THE POWER HEAD FROM THE COLLECTION TANK.

1.

Verify that the power cord is disconnected from the outlet.

2.

Disconnect the hose from the vacuum.

3.

Undo the latches and remove the power head from the collection tank. Place power head on a soft, clean surface upside down.

4.

Clear all dirt or debris from the collection tank and hose into a proper waste container.

5.

Clean or replace the filters.

6.

Check the hose, attachments, and power cord to ensure that they have not been damaged.

7.

Place the power head back on the collection tank and secure latches.

**IMPORTANT:** Clean or change the filter regularly for best performance. **"ALWAYS USE THE REUSABLE CLOTH FILTER FOR DRY VACUUMING"**. If the machine is used without the reusable cloth filter, the motor will burn out and the warranty will be voided. Always keep spare filters on hand.

**NOTICE:** The filters included are made of high-quality materials designed to stop small dust particles. The reusable cloth filter should be used for dry pick-up only. A dry reusable cloth filter is necessary to pick up dust. If the reusable cloth filter is wet, it will clog quickly and be very difficult to clean. Handle the filter carefully when removing it for cleaning or replacing. Check the filters for tears or small holes. A small hole can let dust pass through and out of the filter. Do not use a filter with holes or tears; replace it immediately.

#### STORAGE

Before storing your vacuum, the collection tank should be emptied and cleaned. The accessories should be cleaned and stored so they can be readily available when needed. Store the wet/dry vacuum indoors.

#### REPAIRS

Repairs for this wet/dry vacuum should be performed only by qualified service personnel using only identical replacement parts.
