Building or remodeling?

Sinks, faucets, vanities, tubs, lighting and accessories – you’ve got a lot to think about! Frank Webb Home showrooms make things simple by taking you through your project step-by-step. We’ll help you choose the products that work for you, within your budget and your timeframe, to create the look you want.

STEP 1

Define your goals.

Will you update the existing layout with new fixtures? Or redesign/expand the room? Take into account short- and long-term effects, such as the needs of everyone who will use the room and your home’s resale value.

STEP 2

Get it on paper.

A visual representation of your space is essential to choosing the perfect products. You may already have plans or blueprints. If not, just use the attached graph paper to sketch the layout of your room. Take as many measurements as possible. Each box represents one square foot. Don’t forget to note doors and windows.

STEP 3

Gather ideas.

Look online and through magazines. Talk to friends. Build a picture file of rooms, products and floor plans that catch your eye. Don’t limit yourself to what you think you can afford just yet. This idea file will help you define a look and feel that reflects your tastes and will serve as a reference point throughout your project. Make sure to bring these ideas with you when you are ready to begin your project.

STEP 4

Set a budget.

You know what you like, and you’re getting a sense of how different products will serve your family’s needs. It’s time to determine how much you want to spend for your project. Your Frank Webb Home showroom consultant is an expert at matching the look you want to the amount you’ve decided to invest.

My budget is: \$ _____

STEP 5
