1 Introduction

1.1 Background

This user manual is to help you maintain, update and use your new Ecommerce website easily and quickly. You'll find detailed screenshots, explanations and instructions on how to manage your new store.

After you've tried it a couple of times, you'll find it's easy to use and you may not need this guide any longer, but it is here as a reference.

1.2 About Your Website

Your Ecommerce website is built using a system called Shopify. Shopify is one of the most robust, well-known and secure systems on the web, and is built specifically for selling, shipping and managing hard goods.

2 Basics: Accessing your website and Admin

2.1 Accessing your website

You can access your website from:

- 1) What your customer sees, also known as "The Front End":
<http://amfora.myshopify.com/>
- 2) The Admin panel, where you can change your website or add new products:
<http://amfora.myshopify.com/admin>
You'll need to enter your username and password.

2.2 The Admin Area

The admin area is where you can make changes, add new products, check for orders, and anything else related to your website.

Once you have logged in, you will see a list of administrative items on the left side of the screen. You can use these to move around the admin section.

2.3 Adding and removing staff from your shop

For the site administrator

If you like, you can give access to staff members, so they can access and change parts of your shop. This takes less than a minute.

To give a staff member access, log in to your account and do the following:

1. Click **Settings** (left-hand menu)

2. Click 'Account' (left-hand menu). In the main screen under Staff Members click 'Invite staff member'

Staff Accounts

Staff accounts will have access to your shop's administrative area. An email will be sent out including information on how to activate that account.

☐ Enable Google Apps for accessing the admin

NAME	EMAIL	LIMITED ACCESS
development shop - edit account owner	email@your-store.com	-
Invite staff member		

Your new team member will receive an email, and be able to set their own username and password.

Staff Accounts

Staff accounts will have access to your shop's administrative area. An email will be sent out including information on how to activate that account.

☐ Enable Google Apps for accessing the admin

NAME	EMAIL	LIMITED ACCESS
development shop - edit account owner	email@your-store.com	-

First and Last Name

Email address

Send invite

 or [Cancel](#)

That's it: your staff member will now have access.

To remove a staff member: Navigate to Account as above, and click the trash can icon or "Remove".

2.4 Switching between the front end and admin panel

While logged into the administration panel you can easily switch between the admin panel and your store. This allows you to make changes to your store and then quickly and easily view them so you can see what your customer will see.

To switch from the store admin to the store front click on the 'View your store' button in the upper left of the admin panel.

This will take you to your store in a new browser tab where you can view your changes.

To switch back to the admin panel; from your store click the 'Go to store admin' at the top right of the store.

You will be taken back to the store administration panel.

3 Products: Adding, removing and updating products

Your website comes pre-loaded with several products added. From time-to-time, you might want to add, remove or change product information. This section describes how.

3.1 Adding products

Adding products to your Shopify store is an easy process.

1. From the main tabs at the top of the page click on **Products** as shown below.

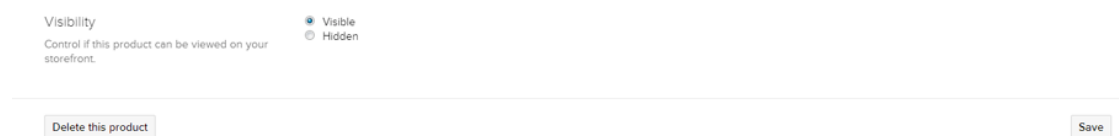

2. You will be taken to the Products page where a list of all your existing products will be displayed. Click **'Add Product'** to begin creating a new product.
3. On the **'Add Your New Product'** page you can enter in the details of your product including:
 - i. Product title
 - ii. Product description
 - iii. Product type (e.g. Eye Shadow, Lip Gloss, Foundation, etc.)
 - iv. Product vendor (manufacturer)
 - v. Selling price, weight, compare at price
 - vi. SKU (unique identifier)
 - vii. Tags : These are required for the filters to work. Add one tag per category. E.g. Region, Type, etc. Similar to the demo "Drinks page".
 - viii. Product images
4. You can also add the product to various collections and feature the product on the home page.

Removing products

First, are you sure you want to **delete** the product? Or do you just want to **hide** it from public view, for example while you get more stock in?

If you really want to delete it:

1. Click on **'Products'** from the left-hand side menu.
2. Locate the product you want to delete in the product listing and click on the product name to enter the product page.
3. At the very bottom of the product page is the **'Delete this product'** button. Click this button and follow the instructions for removing the product from your store.

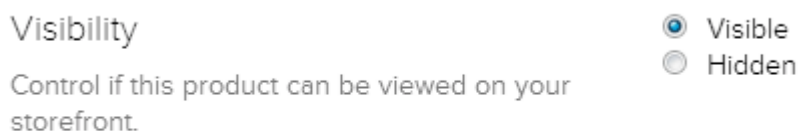

Visibility
Control if this product can be viewed on your storefront.

☒ Visible
☐ Hidden

Delete this product Save

If you just want to hide it:

1. Click on **'Products'** from the main menu bar.
2. Locate the product you want to 'hide' in the product listing and click the product name to enter the product page.
3. At the bottom of the product page, just above the Delete this product button, you will see **Visibility**. Select the radio button for 'hidden'. The product will now be hidden on your storefront. Select 'visible' to make it visible again.

Visibility
Control if this product can be viewed on your storefront.

☒ Visible
☐ Hidden

3.2 Updating products

At some point you may want to update existing products. To update an existing product:

1. Select **'Products'** from the left-hand side menu.
2. Locate the product you wish to update in the list of products now displayed and click on the product name to enter the product page.
3. This will take you to the product page in edit mode.
4. In this mode you can now edit the product title, product description and properties like product type and vendor. You can also add/remove product tags and add the product to different collections.

If you want to update the price of a product or the quantity you can do so from the **'Inventory and Variants'** section of the product page.

1. From the product page of the product you want to update scroll down to the **'Inventory and Variants'** section.

Title	SKU	Price	Quantity
Default Title	—	\$0.00	N/A

[Add a variant](#) [edit](#)

2. Click the **'edit'** link next to the item/variant you wish to edit. This will open up the **'Edit Variant'** window.

Edit variant

Title
Default Title

☒ **Charge taxes**

☒ **Require a shipping address** (not needed for services or digital goods)

Weight (kg)
0

Inventory policy
Don't track inventory

[Cancel](#) [Save](#) [Save and close](#)

3. From here you can update price, SKU and product/variant weight and quantity of product if Shopify is tracking your inventory.

4 Changing menus

Your Shopify store administration navigation is built to allow you easy intuitive access to the things you need most. Each menu item takes you to a core Shopify administrative task. You can do this under Navigation.

4.1 Orders

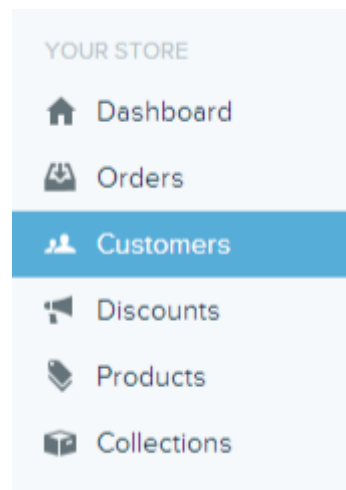

To view and manage orders click on ‘Orders’ in the left-hand navigation menu bar.

This will take you to the orders page where you can manage the status of each order, filter orders or apply bulk actions to multiple orders at once.

4.2 Customers

To view and manage your customers click on ‘Customers’ in the left-hand navigation menu bar.

Here you can track the order history of your customers, see who is spending the most and who keeps coming back. You can also create customer groups or saved searches that can be dynamically updated.

4.3 Products

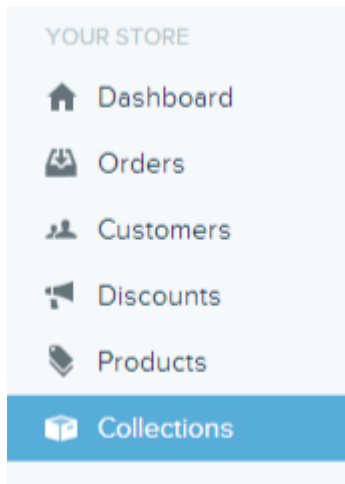

To view and manage your products click on **‘Products’** in the navigation menu bar.

On this page, you can add products, edit & update products as well as export and import lists of products. You can also publish a product or make it hidden.

4.4 Collections (“Groups”)

Collections are groups of products based on some criteria. To add/edit custom and smart collections of products click on **‘Collections’** in the navigation menu bar.

Here you can create and edit collections, which are different groupings of products based on criteria that you choose.

When we set up your store, we’ve created some initial collections. You can refer to these as examples. In order for your products to appear in the right collection, you’ll need to do the following:

- Add the correct product TYPE: E.g. “Bottle” or “Liqueur”; and
- Add the correct product TAGS to the product, e.g. “Scotland”, “Gin”, and so on.
(One tag for each appropriate filter category).

To manage the filters, please go to Apps > Power Filter App.

Blog posts

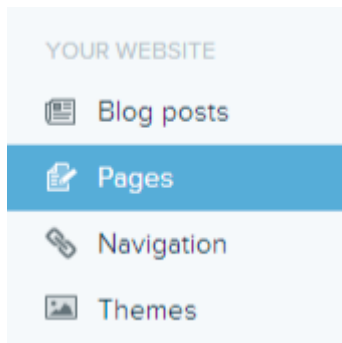

The 'Blog posts' area (under the Your Website section in the left-hand menu) is where you manage your store blog. Click on '**Blog posts**' in the navigation menu bar.

Here you can add new blogs, and write new articles. You can also edit pages and set them to either visible (published) or hidden.

4.5 Pages

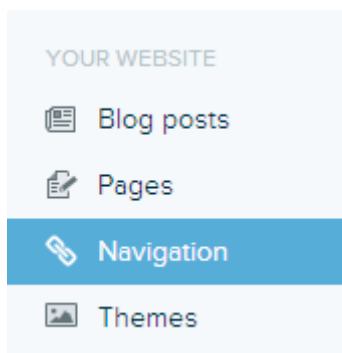

The 'Pages' area is where you add/edit the various pages of your website (e.q. Contact Us, FAQ, About.) Click on '**Pages**' in the left-hand side menu under Your Website.

Here you can add/edit the pages of your website and set them to either visible (published) or hidden.

4.6 Navigation

The navigation tab is where you set your store's navigation menus. Click on '**Navigation**' from the left-hand side navigation menu.

Here you can add/edit Link Lists, which are groups of links that are shown on your shop to help customers navigate around your shop and easily find the products they are interested in.

4.7 Discounts

To add/edit store discounts click '**Discounts**' from the main navigation bar.

In this section, you can add/edit special discounts or discount coupons if your Shopify account plan allows it.

4.8 Apps

Shopify supports a wide variety of apps to provide additional functionality. To add/manage Shopify apps select '**Apps**' from the left-hand side navigation menu.

4.9 Themes

Shopify themes customize the look of your store. To add/edit a theme click '**Themes**' from the left-hand side navigation menu.

Here you can change theme settings, edit theme templates and manage additional themes to further customize the look of your store. You can also search for more themes in the Theme Store.

Note: If you change your Shopify theme, you will lose all customisations to your current theme. We don't suggest doing this unless you are *really* sure you'd like to change the design of your site.

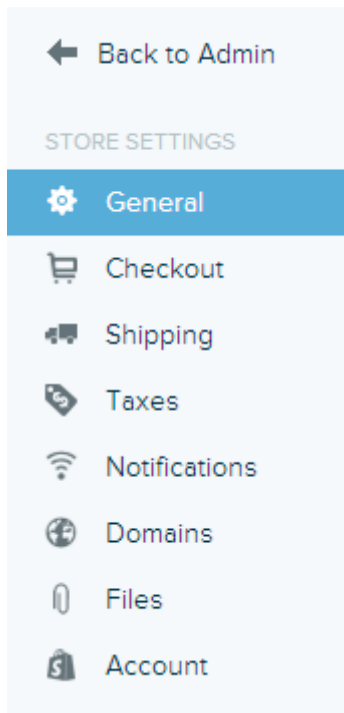

4.10 Settings

The settings section is the main administrative area for managing general settings, regions & taxes, checkout & payment, shipping, email & notifications and DNS & domains. Click on

'Settings' from the left-hand side menu.

This will take you to the Store Settings page where you will see a new left-hand side menu.

1. **General Settings** is where you setup the basic information about your store including store name, email address, shop description, time zone and phone number.
2. **Checkout** sets your payment gateway(s) and the process your customers will go through to make payment on their orders.
3. **Shipping** is where you set your shipping rates, which can be weight-based or price-based.
4. **Taxes** sets your tax zone based on destinations. You can add new destinations and apply custom tax rates.
5. **Notifications** is where you will find the email templates that are sent when customers place orders, when orders are shipped or when orders are

confirmed etc.

6. **Domains** deals with the domain used by your store so that the transition to your Shopify store is seamless.
7. **Files** is where you can upload and manage files such as images, videos and documents for use throughout your store.
8. **Account** is where you can see details of your current plan as well as add staff members to your store.

5 Shipping Options

You set your shipping options in the shipping module, which is accessed by navigating to **Settings -> Shipping**. This will open the shipping page as seen below.

🚚 Shipping

You currently have not setup a shipping address. [Add one now.](#)

Shipping rates

Add new shipping rates to new countries and existing countries.

[Add a country](#)

 Australia - remove country	Add shipping rate	
Standard Shipping	0.00 kg - 5.00 kg	\$10.00 AUD
Heavy Goods Shipping	5.00 kg - 20.00 kg	\$20.00 AUD
<hr/>		
 Rest of World - remove country	Add shipping rate	
International Shipping	0.00 kg - 20.00 kg	\$20.00 AUD

Here you can add a variety of weight-based or price-based shipping rates.

5.1 Weight-based Shipping Rate

To add weight-based shipping rates click the **'Add shipping rate'** button. This will pop up the shipping rate tool.

Add a shipping rate for Australia

Shipping rate name

Criteria

Based on order weight

Weight range

kg — kg

Shipping price

\$

Adjust rates for individual regions

Click on checkbox to enable shipping rate adjustments for a particular region.

Region	Adjust rate	Final rate
<input checked="" type="checkbox"/> Australian Capital Territory	\$ 0	\$0.00 (\$0.00)
<input checked="" type="checkbox"/> New South Wales	\$ 0	\$0.00 (\$0.00)
<input checked="" type="checkbox"/> Northern Territory	\$ 0	\$0.00 (\$0.00)

Cancel Save

Name the new shipping rate, and then under **'Criteria'** choose **'Based on order weight'** and set the weight range and shipping price. Click the Save button to add the new rate.

5.2 Price-based Shipping Rate

To add price-based shipping rates click the 'Add shipping rate' button. This will pop up the shipping rate tool.

Add a shipping rate for Australia ×

Shipping rate name

Criteria Price range
Based on order price ▾ ▶ \$ and up

Shipping price
\$

Adjust rates for individual regions
Click on checkbox to enable shipping rate adjustments for a particular region.

Region	Adjust rate	Final rate
<input checked="" type="checkbox"/> Australian Capital Territory	\$ 0 ▴ ▾	\$0.00 (\$0.00)
<input checked="" type="checkbox"/> New South Wales	\$ 0 ▴ ▾	\$0.00 (\$0.00)
<input checked="" type="checkbox"/> Northern Territory	\$ 0 ▴ ▾	\$0.00 (\$0.00)

Cancel Save

Name the new price-based shipping rate. Under criteria choose 'Based on order price'. You can set the price range the shipping rate will affect by entering the low end of the price range and either using the 'and up' to affect all prices above or click on the 'and up' to enter in an upper range value.

Criteria Price range
Based on order price ▾ ▶ \$ 5 — \$ 25

Shipping price
\$

Click on the 'Save' button to save the new shipping rate.

5.3 Adding More Countries

You may need to ship your items to multiple countries and want to create new shipping rates for those countries. You can do this from the 'Shipping' section. Click on the 'Add Country' button.

Shipping rates

Add new shipping rates to new countries and existing countries.

Add a country

Select the country from the dropdown list and click the 'Add country' button.

Add a country

Start typing the country's name

You can also select "Europe" or "North America" to add all the countries in those regions.

Cancel

Add country

You can then set the preferred tax rate for the new country under 'Taxes' in the left-hand side administration menu.

Taxes

Tax Rates
A list of all the tax rates for the countries you ship to. To add a country to this list, go to [Shipping settings](#) and click on Add a country.

Destination	Country Tax rate	Sub-Regions tax rate
Australia	10%	8 regions
Rest of World	0%	-

Tax settings
Change the way Shopify calculates taxes on your store.

Include taxes in prices
If the checkbox below is selected all taxes will be calculated using this formula:
 $Tax = (Tax Rate \times Price) / (1 + Tax Rate)$. Example £1.00 at 20% VAT will be £0.17 (rounded).

☐ All taxes are included in my product prices

☐ Charge taxes on shipping rates

[Save changes](#)

6 Changing the logo

You can upload a custom logo to bring your storefront together and keep with your brand. The logo is set in your theme settings. Select **'Themes'** from the left-hand side menu and then **'Theme Settings'**.

In Theme Settings select **'General Settings'**:

In the dropdown box for 'Site logo' choose 'Custom uploaded image' and then click the 'Choose File' button to browse and select your logo image. Once done select 'Save' at the bottom of the settings page to save your changes. The logo will now appear on in your store.

7 Orders

7.1 What happens when someone places an order?

When a customer places an order there are a number of things that happen automatically.

- An email is sent to the customer confirming their order.
- An email is automatically sent to site admin with details about the new order.
- The order gets registered in Shopify and will display in the Orders panel of your Shopify store administration.

These emails are fully customizable in the **'Notifications'** panel under **'Settings'**. Here you will find all the email templates that will be sent when an event occurs such as an order being placed, an order shipping or when an order is cancelled.

📶 Notifications

Email templates

These emails are automatically sent out to either you or the customer. Click on the templates below to edit the template. See also the [templates variables documentation](#).

Template	Description
Order Confirmation	Sent to the customer when an order is created
New Order Notification	Sent to all subscribers of Order Confirmation Notifications
New Order Notification (mobile)	Sent to all subscribers of Order Confirmation Notifications for mobile
Shipping confirmation	Sent to the customer when an order is shipped
Shipping update	Sent to the customer when an order's shipping information is updated
Contact Buyer	Used as a default template for 'Email Buyer' emails
Order Cancelled	Sent to the customer when an order is cancelled
Fulfillment Request	Sent to custom fulfillment provider when storeowner fulfills order items

Order notifications

When a new order is placed, you can notify other email addresses and cell phones of incoming orders. You can also subscribe to your orders [RSS feed](#).

[Add an order notification](#)

Notification		
Send email to "Staff Member" <staff@your-store.com>	send test notification	Disable

Webhooks

You can subscribe to events for your products and orders by creating web hooks that will push XML or JSON notifications to a given URL.

About Us

Content

A Formatting B I       

The **About Us** page of your shop is vital because it's where users go when first trying to determine a level of trust. Since trust is such an important part of selling online, it's a good idea to give people a fair amount information about yourself and your shop. Here are a few things you should touch on:

- Who you are
- Why you sell the items you sell
- Where you are located
- How long you have been in business
- How long you have been running your online shop
- Who are the people on your team

To edit this information you can go to the [Blogs & Pages Tab](#) of the administration menu.

SEO

Control how this page shows up to search engines.

9 Collecting money from the store

All customers' order payments will go into your PayPal or Stripe. To extract this money into a bank account, log in to PayPal /Stripe and click **"Withdraw to bank account"**.

10 Checking Web Traffic & Statistics: Google Analytics

Google Analytics is a tool to measure web traffic. It's already set up on your Ecommerce store. To check and view the statistics, go to <http://www.google.com/analytics/>.

11 My question isn't answered here

This manual was created with the most common questions in mind, and kept relatively short so as not to be too overwhelming. If your question isn't answered here, you can:

Contact Us: support@shopifyninjas.com

Look at Shopify's documentation (it's comprehensive and generally easy to understand): <http://support.shopify.com/>

Google the web for the answer to your question: most questions have been posed and answered on the Shopify Forums and can be found quickly.

Feel free to contact us for help.
