

GENERAL DESCRIPTION

The McBride MC11 and MC11A baffles are designed for Public Address Systems to provide a sturdy speaker mount, speaker protection, and an attractive finished appearance.

Both the MC11 and the MC11A are of one piece construction and use a heavy gauge steel for extra rigidity and resistance to warping. The MC11 (pictured) utilizes standard screw mounting for use with our standard round back box or mounting channels. The MC11A is the automatic version utilizing torsion spring mounting for use with our round automatic back box. This allows for a cleaner looking installation and quick ceiling mounting. Both baffles are available as pre-assembled units with various combinations of our quality 8 inch speakers and line matching transformers (6 assemblies per carton).

All McBride baffles are finished in satin white with a tough baked enamel for resistance to chipping and corrosion.

ARCHITECTURAL SPECIFICATIONS

MODEL MC11

The Flush Ceiling Baffle Shall be a McBride Model MC11. The baffle shall be constructed of heavy gauge steel, finished in satin white baked enamel and shall measure 12-3/4 inches in diameter and 3/16 inches deep. The 8 inch McBride loudspeaker shall mount on concealed studs. Four holes shall be provided to mount the baffle to a McBride model MC10E back box or McBride model MC100 mounting channels (2 required).

MODEL MC11A

The Flush Ceiling Baffle Shall be a McBride Model MC11A. The baffle shall be constructed of heavy gauge steel, finished in satin white baked enamel and shall measure 12-3/4 inches in diameter and 3/16 inches deep. The 8 inch McBride loudspeaker shall mount on concealed studs. The baffle shall fasten to a McBride model MC10EA back box with torsion springs and no screws shall be visible on the front of the baffle.
