

GENERAL DESCRIPTION

The McBride MC14 baffle is designed for Public Address Systems to provide a sturdy speaker mount, speaker protection and an attractive finished appearance.

Designed for use with back boxes that are installed into concrete formers before pouring, the round MC14 features the proper mounting screw pattern for use with this type of installation.

The MC14 is of one piece construction and uses heavy gauge steel for extra rigidity and resistance to warping. The MC14 is also available as a pre-assembled unit with various combinations of our quality 8 inch speakers and line matching transformers (six assemblies per carton).

As with all McBride baffles, the MC14 is finished in satin white with a tough baked enamel for resistance to chipping and corrosion.

ARCHITECTURAL SPECIFICATIONS

MODEL MC14

The Flush Ceiling Baffle Shall be a McBride Model MC14. The baffle shall be one piece and constructed of heavy gauge steel. The baffle shall be finished in satin white baked enamel and shall measure 11 inches in diameter and 3/16 inches deep. The 8 inch McBride loudspeaker shall mount on four concealed studs. Four holes shall be provided to mount the baffle to a McBride model MC11E back box.
