

**GENERAL DESCRIPTION**

The McBride MC25 and MC25A baffles are designed for Public Address Systems to provide a sturdy speaker mount, speaker protection, and an attractive finished appearance.

Both the MC25 and the MC25A are of one piece construction and use a heavy gauge steel for extra rigidity and resistance to warping. The MC25 (pictured) utilizes standard screw mounting for use with our standard square back box or mounting channels. The MC25A is the automatic version utilizing torsion spring mounting for use with our square automatic back box. This allows for a cleaner looking installation and quick ceiling mounting. Both baffles are available as pre-assembled units with various combinations of our quality 8 inch speakers and line matching transformers (6 assemblies per carton).

All McBride baffles are finished in satin white with a tough baked enamel for resistance to chipping and corrosion.

**ARCHITECTURAL SPECIFICATIONS**

**MODEL MC25**

*The Flush Ceiling Baffle Shall be a McBride Model MC25.* The baffle shall be constructed of heavy gauge steel, finished in satin white baked enamel and shall measure 12-1/2 inches square and 3/16 inches deep. The 8 inch McBride loudspeaker shall mount on concealed studs. Four holes shall be provided to mount the baffle to a McBride model MC20E back box or McBride model MC100 mounting channels (2 required).

**MODEL MC25A**

*The Flush Ceiling Baffle Shall be a McBride Model MC25A.* The baffle shall be constructed of heavy gauge steel, finished in satin white baked enamel and shall measure 12-1/2 inches square and 3/16 inches deep. The 8 inch McBride loudspeaker shall mount on concealed studs. The baffle shall fasten to a McBride model MC20EA back box with torsion springs and no screws shall be visible on the front of the baffle.
