NEW!

MC8A / MC8AB Low Visibility Automatic Ceiling Baffle

The new McBride MC8A (white) and MC8AB (black) ceiling baffles are perfect for any paging and/or background music installation where an unobtrusive and aesthetically pleasing appearance must be maintained.

The outside diameter of this baffle is 22% smaller than standard round ceiling baffles, and the wide, gently tapered edge blends smoothly to wall or ceiling. Hidden speaker mounting studs and automatic baffle retention springs mean there is no external hardware to detract from the overall appearance of any room or setting.

Finished in a new, bright white, semi-gloss baked powder coat epoxy the McBride MC8A blends perfectly with today's whiter ceiling tiles and modern ceiling/room treatments. The black MC8AB version is finished in the same semi-gloss baked powder coat epoxy.

Specifications:

Part Number:	MC8A (white) MC8AB (black)
Baffle Type:	Automatic type, low visibility circular ceiling baffle w/perf. sound area.
