The McBride MCB10 is a high performance professional and commercial sound 2-way loudspeaker system designed for pro sound reinforcement, public address, night club, house of worship, disk jockey and arena applications.

Design Features Include:

- High efficiency drivers and low loss crossover make the most of every watt from your amplifier.
- Superior projection and high speech intelligibility.
- Built in Pole/Stand socket.
- High output without distortion for accurate sound reproduction.
- Rigid design and high density materials prevent bass robbing enclosure vibrations.
- Dual 1/4" parallel inputs on recessed steel dish.
- Tough Texturelac finish and full size steel grill to withstand abuse and rough handling.
