

**GENERAL DESCRIPTION**

The McBride SMC20E and SMC20EA surface mount back boxes are designed for Public Address Systems to provide a sturdy baffle mount, speaker protection and back wave cancellation.

Both the SMC20E and the SMC20EA are constructed of heavy gauge steel for extra rigidity and resistance to corrosion. The SMC20E (pictured) utilizes standard screw mounting for use with our all our 12-1/2 inch square flush ceiling baffles. The SMC20EA is the automatic version utilizing torsion spring mounting for use with our square 12-1/2 inch automatic flush ceiling baffles. This allows for a cleaner looking installation and quick ceiling mounting.

The McBride SMC20E and SMC20EA surface mount back boxes feature two quick mount brackets with slotted holes and a tough satin white baked enamel finish.

**ARCHITECTURAL SPECIFICATIONS**

**MODEL SMC20E**

*The Surface Mount Ceiling Back Box Shall be a McBride Model SMC20E.* The back box shall be constructed of heavy gauge steel and shall measure 12-13/16 inches square and 4 inches deep. The baffle mounting holes shall be spaced on 11 inch centres. All standard 12-1/2 inch square McBride flush ceiling baffles shall mount to the SMC20E with screws to the provided speed nuts. Two quick mount brackets with slotted holes shall be provided to mount the SMC20E. The back box shall be finished in satin white with a tough baked enamel.

**MODEL SMC20EA**

*The Surface Mount Ceiling Back Box Shall be a McBride Model SMC20EA.* The back box shall be constructed of heavy gauge steel and shall measure 12-13/16 inches square and 4 inches deep. The mounting holes shall be spaced on 11 inch centres. All automatic McBride 12-1/2 inch square flush ceiling baffles shall mount to the SMC20EA with torsion springs to slotted brackets provided inside the back box. Two quick mount brackets with slotted holes shall be provided to mount the SMC20EA. The back box shall be finished in satin white with a tough baked enamel.
