Leon Trotsky Speaks

BY LEON TROTSKY

A collection of Trotsky's speeches and writings spanning the years 1906-40. It attempts to let Trotsky speak for himself about major events in his life, but avoids the republication of speeches and writings readily available elsewhere in English. A number of writings have been translated and published in English here for the first time. Unlike most of the recent Pathfinder volumes of Trotsky's works, this one provides valuable and welcome introductory material to each selection. Foot-noted. Indexed. Recommended for all libraries.
