Synopsis: A decades-long retreat by the working class and unions has come to an end, as owners of capital and their parties shift the burden of their crisis onto working people's backs. More and more workers (of all ages, skin colors, and both sexes) are saying, "Enough is enough!" They have begun to wield the collective power of the exploited producers in response.

With the publication of "The Low Point of Labor Resistance is Behind Us: The Socialist Workers Party Looks Forward", the team of Jack Barnes, Steve Clark, and Mary-Alice Waters draw from the trade union and broad political work of members and followers of the Socialist Workers Party to highlight the opportunities ahead for class-conscious workers.

"The Low Point of Labor Resistance is Behind Us" sets the course of action needed to forge a labor party built on unions that can and will fight for their members. And a mass proletarian vanguard able to lead the struggle to end capitalist rule, opening a future for humanity. The global order imposed by victors of the inter-imperialist slaughter of World War II is shattering, with explosive ramifications for workers and farmers worldwide.

Critique: Informatively analytical, thoughtful, thought-provoking, and politically inspiring, "The Low Point of Labor Resistance is Behind Us: The Socialist Workers Party Looks Forward" is especially and unreservedly recommended for community and academic library Political Science collections and for the personal reading lists of anyone with an interest in communism, socialism, class sociology, and the evolution of political parties.
