**Fidel Castro: Nothing Can Stop the Course of History**

INTERVIEW BY JEFFRY M. ELLIOT AND MERVYN M. DYMALLY

---

**Reviewed by:** Victoria Britain, editor, Third World Review

This long interview which Fidel gave to two Americans — a Congressman and an academic — is a brilliant introduction to the Cuban leader's ideas. It should play a part in demystifying Fidel and placing his theories in the mainstream of current Third World thinking. For too long the US government has managed to marginalise Fidel. His ideas on such subjects as debt and democracy are certainly a major threat to US interests — best served by compliant Third World dictators. But a wide audience, not only in the Third World, now acclaims every collection of his work — like this excellent little book.
