# Activation

7. Press the "Start Using" button on the activation which was sent to your email address and open the app.

8. In case the activation is not successful, you can get support from **customerservice@fukintuned.com**

# Bluetooth Connection

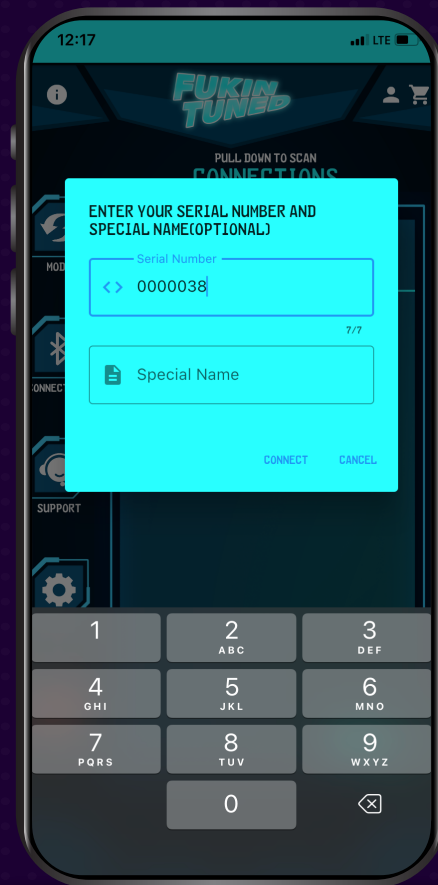

**9.** Touch to Start

**10.** Find and select Fukin Tuned that comes up in the Bluetooth scan.

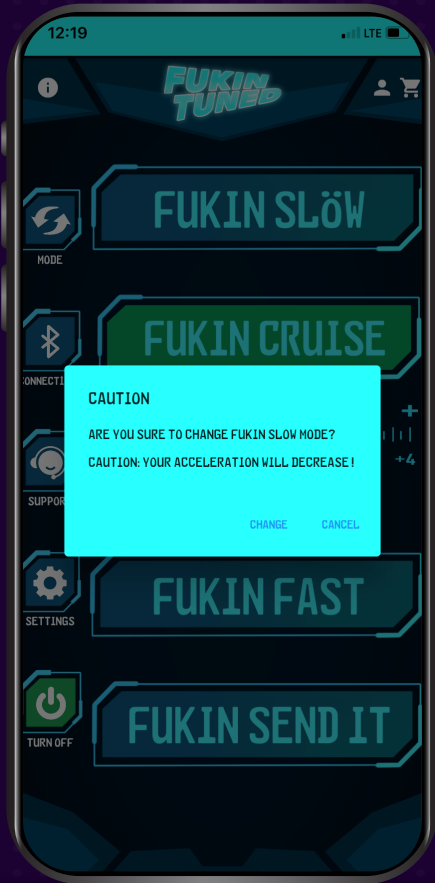

# Login To The App

**11.** Enter the 7-digit serial number located on the side of the device or on the side of the box.

**12.** Name your device and simply press the 'Connect' button.

# Modes

**Fukin Slöw:** Select the Fukin Slöw Mode and choose 'Change'. This mode deliberately reduces the throttle response to enhance control in challenging weather and land conditions.

**Fukin Cruise:** It provides faster throttle responses in the urban area.

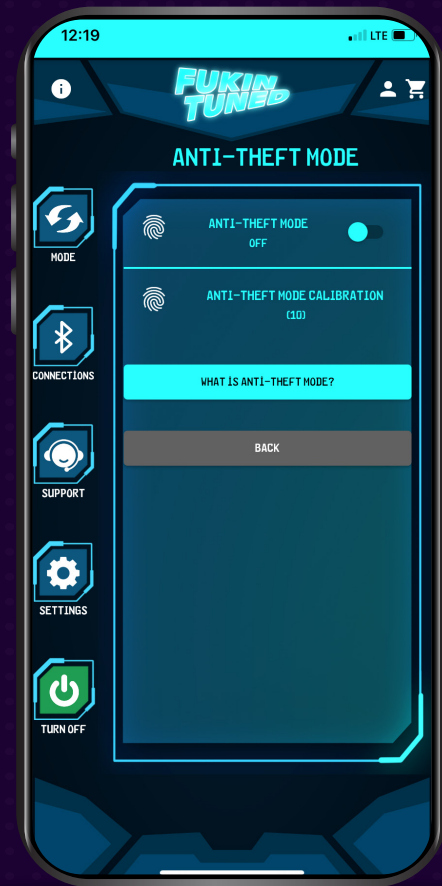

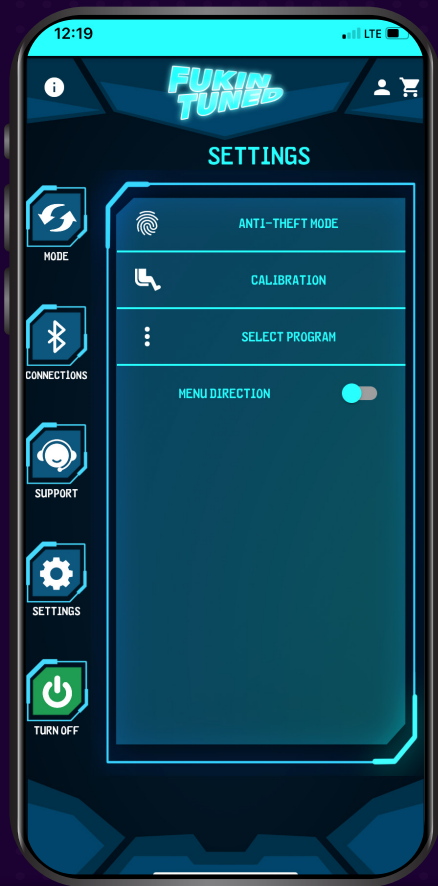

**Fukin Fast:** It offers even stronger responses than Fukin Cruise, while remaining suitable for urban use.

**Fukin Send It:** It is the quickest mode which is good for racing or track days.

Each mode can be adjusted to 9 different levels.

# Anti-Theft Mode

**13.** Go to settings and simply press the Anti-Theft Mode.

**14.** Do the calibration.

-Calibration mode is only done once when you enable Anti-Theft Mode, and you won't need to do it again.

# Remote Software Update

**Essential:** It is the program defined by a Fukin Tuned personnel according to your request. You cannot change the mode without this update.

**Standard:** It is the program defined by a Fukin Tuned personnel according to your request. You can install this update at any time.

If you want your Fukin Tuned to change throttle responses, (The process of accelerating or reducing the response), You can request remote software by contacting our technical department.

When you connect to the device from the application, you will receive an "Essential Update Available" warning. Press the "Update" button to install the software.
