

COLLOIDAL GOLD

The structured protein of this colloidal Gold is created by a high voltage charge from pure gold electrodes. It is absorbed by the nuclei of Hydrogen and Oxygen of the pure energised water. The Colloidal component is fifty percent of the Gold discharged into the water in nano-particle size, thus small enough to be utilised by the nuclei of the cells if required. Each particle has its own positive charge so they repel from each other while staying in total suspension when stored as directed.

What is the use and function of Colloidal Gold?

Research so far, does not indicate an 'ideal' dosage. The dose that works for one is not necessarily the same for the other. So far, no-one has found any limits for a maximum dosage. Some claim that it is the same as Colloidal Silver, in that you cannot 'overdose' with it. Gold it seems (though no claims are made), can do no harm and does not interfere with anything else the patient is taking -nor is it contraindicated for any particular ailment.

Historical Uses

Ancient Egyptian and Chinese civilisations used Gold Therapy, or Chrysotherapy. The main aim of these therapies appeared to be to reverse, inhibit and prevent joint and bone damage from rheumatism, rheumatoid arthritis and aging. In medieval Europe, alchemists supplied powdered Gold in drinks, for sore limbs [arthritis]. In ancient Rome, Gold salves or ointments were used for skin ulcers. Recently, archaeologists discovered Gold dentistry 4500 years old. The use of gold in modern medicine probably began with German bacteriologist Robert Koch, who discovered, around 1890, that gold compounds inhibited the growth of the tuberculosis bacillus. Koch received the Nobel Prize in Medicine.

Today, modern medicine uses **Gold** in many areas, including in **surgery**, to patch damaged **blood vessels, nerves, membranes** and **bones**. Several forms of **cancer** are treated with Colloidal gold including **prostate** and **ovarian** cancers. It is also used to treat **MS, spinal problems, discoid lupus, glandular** and **nervous conditions**, and **bronchial asthma**.

Further, **Colloidal gold** offers relief of pain associated with **arthritis, rheumatism, rheumatoid arthritis**. Gold is able to **remove blockages**, assists with **poor circulation, tissue regeneration** of the **heart, spleen, pancreas** and **muscles**. It is said to be effective against **aneurysms**. It can also stimulate the **pituitary** and **pineal** glands and improve the **absorption of nutrients**. It stabilises **collagen**, inhibits or releases **enzymes** as required by the body. Gold appears to help create a harmonising effect on the rhythmic balancing and healing activity of the heart, as well as improving **blood circulation**.

Gold rejuvenates the glands and stimulates the nerves, assists with digestion and helps to regulate body temperature. The immune enhancing properties benefit those suffering with **Chronic Fatigue** and it has potential with addictions. Gold also has some less immediate qualities, with **longevity, anti-aging** and is also very effective in the fight against **clinical depression** and **neural dysfunctions**. Colloidal gold helps the **right/left brain balance** and possesses remarkable **sedative** properties without impairment. This may suggest it helps **enhance spirituality!**

However, simply stated- the most important use of true Colloidal Gold is to **STRENGTHEN THE NATURAL IMMUNE FUNCTION** and to **OPTIMISE OUR DNA POTENTIAL** (see Bruce Lipton or Dan Winter among others for detailed information).

How to take Colloidal Gold

Reported maintenance dosage is 5-mls per day. More may be tried with your own consideration.
