

**GUARDIAN** with **MICROBAN**®

PROTECTION THAT LIVES ON

## THREAD WITH ANTIMICROBIAL PRODUCT PROTECTION

Guardian with Microban® creates a zone of protection that prevents the growth of odor causing bacteria and microbes that would normally congregate and spread into places like a sewn seam. Fabrics can be wiped clean, but seams create crevices and areas that cannot be reached, making them the hardest areas to keep clean. Products using Guardian with Microban® thread stay cleaner and fresher for longer. These benefits make it perfect for many different applications such as medical, athletic equipment, transportation, and theaters.
