

# Pro-Spun

## Spun Polyester with Uniform Quality, Colorfastness, and Smoothness

Pro-Spun Polyester thread is made by spinning staple fibers into yarns and then plying the yarns together. This creates a high strength sewing thread with uniform quality, colorfastness and smoothness. Pro-Spun is similar to cotton in flexibility, but stronger and more resistant to stress. Perfect for use with light to medium weight fabrics. Spun polyester is also an excellent choice for serging and overlock machines.

Applications: blouses, bras, children's wear, dresses, lingerie, neckties, shirts, skirts, sleepwear, underwear.

Black, White, Natural MOQ = 1 Spool  
Colors MOQ = 5 Spools  
Case = 50 Spools.

# Pro-Core

## Strong, Flexible Poly Core/Corespun

Pro-Core is a polyester core thread (sometimes referred to as corespun) that is made by wrapping staple polyester fibers around a continuous filament polyester core. The fiber surface provides the flexibility and smoothness for excellent sewing performance, while the continuous filament core increases strength and eliminates skipping problems during stitching. Perfect for topstitching and for applications where higher seam strength is important.

Applications: aprons, bedspreads, blankets, caps, coats, comforters, corsets, curtains, draperies, dresses, gloves, girdles, hats, jackets, jeans, pants, rainwear, skirts, sportswear, suits, swimwear.

Black, White, Natural MOQ = 1 Spool  
Colors MOQ = 5 Spools  
Case = 50 Spools.
