

Upholstery by Correct Craft using SolarFix® PTFE Thread for construction and design element.

DON'T LET YOUR REPUTATION HANG BY A THREAD

THREAD MAY NOT SEEM LIKE A SUBSTANTIAL PART OF UPHOLSTERY CONSTRUCTION, BUT THREAD ACCOUNTS FOR 50% OF THE MATERIALS' INTEGRITY.

SolarFix® PTFE is the ideal thread for use in marine applications because of its resistance to UV sunlight, salt water, cleaning chemicals, mildew and other harsh outdoor elements.

Your customers expect superior quality materials in their upscale boat, so use only the best:

*Contact QTN for a list of safe cleaners that have been QTN Quality Assurance Tested.

SolarFix® is AY Tech LLC's registered trademark for synthetic fiber, thread, and yarn.
