The thread shades listed have been formulated to offer the highest standards in color matching for the fabrics listed in the chart. Due to manufacturing and dyeing processes, the thread may appear darker on the tube than on the color card. When sewn into the fabric, the thread should match the colors shown on this card. During situations in which the thread color is different from the fabric, please test for compatibility before use. Since the conditions of use, washing, cleaning, etc. are beyond our control, the user of these products should determine if the character of the dye and all other characteristics of the products are suitable for the purpose for which they are intended. No warranties or guarantees expressed or implied are made as to the use or method of application of any adhesive materials and products. As the value of the products are so disproportionate to the value of the material into which they are included we cannot assume responsibility for consequential damages.
