To Whom It May Concern:

The Safety Sleeper® is an enclosed bed designed for people with special needs. The enclosure is intended for the use of protecting children or adults with night problems, including but not limited to night seizures, night wandering, thrashing or uncontrollable spasms, and hyperactivity. It provides a regulatory environment for patients who need a consistent and safe sleeping environment at home and when traveling.

The device is classified as a Class I medical device approved by the FDA with the registration number 3011389091 under Abram's Nation, owner number 10048434. Confirmation of The Safety Sleeper®'s FDA approval can be found in the U.S. Food & Drug Administration medical device database using the following link:

<https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfRL/rl.cfm?rid=179198>

We ask that you acknowledge medical devices travel free of charge, as established by current laws under the Air Carrier Access Act (ACAA), enforced by the United States Department of Transportation.

Please contact me with any questions.
