## Introduction

Remarkable improvements in almost all of the AQUACOUNTER® product line have been accomplished by the Hiranuma factory in Japan along with the introduction of two new products that round out our "Analyzer" category. With the exception of the salt analyzer and our low cost 300 series KF titrators, which undergo constant improvements unseen by the end user, all Hiranuma instruments have been upgraded and enhanced with the adaptation of a large, color touch screen, a USB flash memory port, a standard built-in printer, compact, easy-to-use burets, extended lifetime and enhanced software. Computer control, true plug-and-play and multitasking, multiple work stations operating in parallel contribute greatly to the flexibility and ease of use for the laboratory analyst.

One of the newest products, the CLD-100 Salt Analyzer, has been selected as a WINNER in the Analytical Instruments Category of *Laboratory Equipment* magazine's 2010 Reader's Choice Award.

As always, all AQUACOUNTER® instruments are rugged, reliable, backed by a comprehensive warranty, coupled with excellent technical support, and are very competitively priced. All in all, simply "remarkable".

## Potentiometric Titrators

### Automatic Titrator COM-1700S / 1750 Series

#### **Features**

- · Up to four independent titration stations can run at the same time!
- Comprehensive data handling!
- · Compact design!
- New patented technologies!
- GLP compliant functions!

Large sized color graphics LCD displays real-time titration curves and differential curves to show reaction tendencies, etc. All information is easily viewed.

#### Titration with a small amount of sample is possible thus reducing analysis costs and waste. (Optional)

Measurement with 1/2 of the sample volume is possible by using sample vessels and electrode holders that are designed for small amounts of samples. The reagent amount to be used and the waste solution volume after measurement can be greatly reduced, thus saving time and money.

#### GLP correspondent functions to support reliability of the titration results are provided.

For instance, buret precision tests and electrode calibration slope measurements add to the reliability of the titration results. Useful functions for maintenance such as electrode information display, reagent remaining volume indication etc. are also provided.

#### Data storing function to USB JumpDrive is provided. Large numbers of data points may be archived.

The titration results and titration conditions including titration/ differential curve data can be stored on a USB JumpDrive to perform recalculation and redetection.\* Reading, recalculation and redetection of titration results, and use of data by using other application software is possible by simply downloading the data to a laptop or PC for storage or processing.

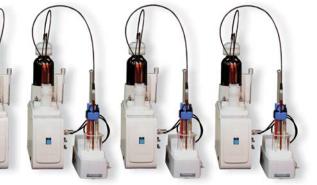

\*To edit and view the data stored in USB, an optional software "Titra-Net Viewer" is necessary. The PC-controllable type, COM-1750, is provided with this software CD.

This titrator may be used as an automatic titration station for multitasking applications.

Different titrations can run in parallel at the same time!

Up to four titration stations are available on

Up to four titration stations are available on both the base stand-alone unit and the PC-controlled unit.

### Measurement Modules for the COM-1700

Model	Uses	Specifications
S-1700	For Potentiometric Titration	3 inputs [mV, pH(mV)] 0~14 pH, ±2000mV, 0~100°C *Acid/base, redox, precipitation, non-aqueous titrations
M-1700	For Photometric Titration Chelatometric titration, Neutralization titration, Oxidation reduction titration, Deposition titration, Non-aqueous titration	3 inputs [T%(Abs), pH(mV), mV] 0~100T%, 0~14 pH, ±2000mV, 0~100°C Includes: optical probe, interference filters (650nm, 530nm) *Chelatometric, acid/base, redox, precipitation, non-aqueous titrations
P-1700	For Polarization Titration Amperometric titration, Neutralization titration, Oxidation reduction titration, Deposition titration, Non-aqueous titration	3 inputs [mV( $\mu$ A), pH(mV), mV] $\pm$ 200 $\mu$ A, 0~14 pH, $\pm$ 200mV, 0~100°C Polarization voltage: 0~1V current: 1~5 $\mu$ A (5 steps, selectable) Includes: TPT-351 twin platinum electrode *Amperometric, acid/base, redox, precipitation, non-aqueous titrations
E-1700	For Conductometric Titration Conductometric titration, Neutralization titration, Oxidation reduction titration, Deposition titration	3 inputs [µS, pH(mV), mV] 0~14 pH, ±2000mV, 0~100°C, 0~200 / 2000 / 20000µS Includes: TPT-351 twin platinum electrode, power box, platinum black electrolyte solution *Conductometric, acid/base, redox, precipitation, non-aqueous titrations

<sup>\*</sup>One of the measurement units must be attached to the main unit.

#### **Options**

#### Various optional probes are available.

Photometric Titration, Polarization Titration, Conductometric Titration are possible by using the appropriate measurement probe.

COM-1750 Series shown with PC Control. •PC must be provided by end user.

## COM-1700S/1750 Potentiometric Titrator Specifications

Item Specifications

Multitasking function Control up to 4 parallel titration stations

Titration methods Potentiometric titration (acid/base, redox, precipitation, non-aqueous, complexometric

titrations), Photometric titration, Polarization titration, Conductometric titration \*each

requires a proper measurement unit: S/M/P/E-1700 amplifier.

End-point detection method Learn titration, Auto inflection-point detection, Set-point detection, Set/Auto end-point

detection, Cross-point (F,B,V1,V2) detection, Dispensing, TAN/TBN in petroleum

products (Oil1/Oil2), pH measurement, pH-Stat, pKa, Calculation mode.

File function Titration run files: 50 files

Sample files: 99 files (Sample No., ID code, Sample size, Master file)

Auto input function Automatic input of blank, factors, concentration measurement results

Calculations Concentration calculation, statistics calculations, pH automatic compensation,

recalculation

Data capacity COM-1700 Internal memory: 100 data

USB flash memory (≥256MB) Max. approx. 9900 data

COM-1750 255 data/folder

GLP compliant function Buret precision test, Electrode check, Buret use frequency, Electrode maintenance,

Reagent level alarm

Burets Expandable up to 10 burets per titration station

Printer COM-1700 Built-in thermal printer (paper width: 58mm)

\*Optional external printers: Thermal printer PRINTY3 or Dot impact printer PR-302B

Touch panel screen COM-1700 7.5 inch color graphics LCD

Kit for PC system COM-1750 PC card, connector, software \*PC is not included.

\*The PC must have a slot for PC card type I&II

External input/output RS-232C: 1 port, LAN: 1 port, USB flash memory stick: 1 port

Interfaces for external printer and C-1712 sample changer

Power supply COM-1700 AC100-240V, 50/60Hz, 60VA

COM-1750 AC100-240V, 50/60Hz, 220VA (depends on the PC)

Dimensions / Weight COM-1700 Main unit: 250(W) x 400(D) x 150(H) mm / Approx.6kg

#### B-1700 Buret / TS-1700 Titration Station

Buret capacity 20-mL clear glass syringe (standard) \*Options: 1, 5, 10, 50mL syringe

Minimum increment volume 1.25 $\mu$ L (in 20mL syringe)

Buret precision Accuracy:  $\leq \pm 0.1\%$  (full discharge of 20mL syringe)

Repeatability: ≤ 0.01mL (full discharge of 20mL syringe, SD for n=6)

Linkable buret number TS-1700 Up to 9 units of B-1700

Power supply AC100-240V, 50/60Hz, 50VA

Dimensions / Weight B-1700 104(W) x 240(D) x 410(H) mm / Approx. 4kg \*Buret-head included TS-1700 104(W) x 325(D) x 410(H) mm / Approx. 5.5kg

#### COM-1700S Automatic Potentiometric Titrator

Add a Model C-2012 Automatic Sample Changer and automate repetitive testing.

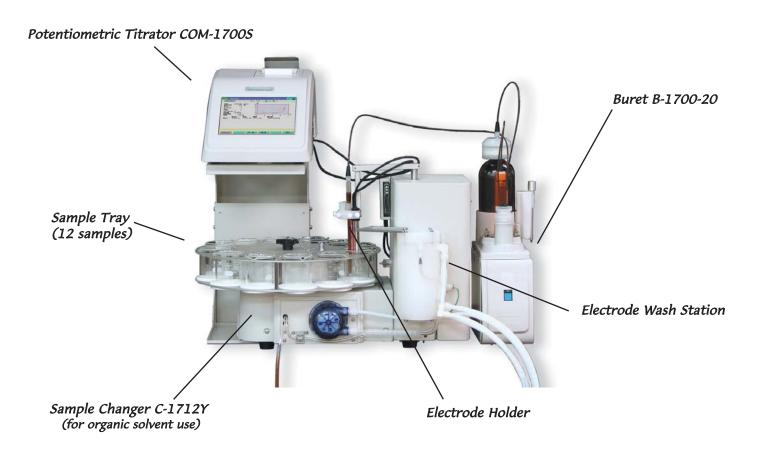

When using the Sample Changer, pH calibration can be performed automatically too. Reliable measurements can be carried out efficiently.

Totally compatible with various ASTM methods including ASTM D664 for TAN analysis, ASTM D2896, and D4739 for TBN analysis.

Fully programmable Titration Sequence; Determination of end point pH using stock buffer solution can also be automated.

Electrode preparation between tests is performed in the washing station automatically.

Environmentally responsible; separate collection of electrode washing solvent and water.

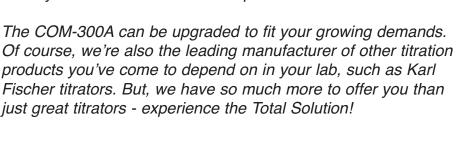

#### COM-300A Potentiometric Titrator

#### The Total Solution for All Your Titration Needs...

Looking for a titrator that is reliable and simple to operate yet expandable and upgradeable? The COM-300A titrator from AQUACOUNTER® offers the Total Solution - the features you asked for at a price you can afford.

Think you'll need more later? No problem.

The COM-300A can be upgraded to fit your growing demands. products you've come to depend on in your lab, such as Karl Fischer titrators. But, we have so much more to offer you than just great titrators - experience the Total Solution!

#### **Features**

#### COM-300A TITRATOR - the right features at the right price!

- Performs pH, acid/base, complexometric, redox, Karl Fischer, non-aqueous titrations and ISE measurements
- Determines TAN/TBN in oils and p and m alkalinity
- Optional extra buret available
- · Choice of impact printer or thermal printer
- Linked methods are available up to three (3) per titration
- · One-touch calculations including statistics package!
- Over thirty (30) files of built-in method memory, including Karl Fischer
- Built-in memory of up to 50 results or via external computer link
- · Balance and computer interfaces for GLP and ISO documentation

Options		
Thermal printer	PR-2000T2 or PR-301	
Dot impact printer	PR-302	
Extra buret	B-130-20	
Extra stirrer unit	K-2000A2S	
Photometric unit	M-530	
Karl Fischer titration kit KF-300		

COM-300A with additional buret (option).

## COM-300A Potentiometric Titrator Specifications

ITEM SPECIFICATIONS

Titration process Potentiometric and Polarization (Karl Fischer)

Measuring range pH: 0 to 14, Resolution 0.01pH

mV: -2000 to +2000 mV, Resolution 0.1 mV

Electrode inputs Indicator electrode: 1

Reference electrode : 1 Temperature electrode : 1

KF electrode: 1

Titration steps Up to three (3) steps

Number of endpoints Up to two (2) endpoints

Endpoint detection 
Automatic detection by:

-Inflection point-Set point-F Cross point-B Cross point

Display system 2 lines, 16-digit LCD with backlighting

Display items Titration parameters, results, statistics

Display units pH, mV, mg H<sub>2</sub>O, %, ppm, M, g/L, mg/g, Fact 1, Fact 2

pH calibration 2 or 3 points (compliant to ASTM or other standard buffers)

File function 30 files for potentiometric titrations

3 files for Karl Fischer titrations 10 files for titration control methods

Calculation items Concentration, statistics

Memory 50 titration results along with titration curves and parameters and via external

computer

Precautions against

power failure

Built-in backup battery

Buret capacity 20 mL, minimum drop size = 0.01 mL

Resolution = 1/16000 of buret volume

Stirrer Integrated, variable speed, magnetic stirrer

External input / output Balance interface and RS-232C data output

Dimensions 310 (W) x 270 (D) x 310 (H) mm

Weight 7 kg

Power supply / Power

AC100 - 240V, 50/60 Hz

consumption

Safety approval CE approved

## Karl Fischer Titrators

### AQ-2200S Karl Fischer Coulometric Titrator

The AQUACOUNTER® AQ-2200S high-end titrator is ideal for the trace level water content determination with its excellent capability and upgraded performance.

#### **Features**

#### **Economical & Eco-friendly small-volume cell!**

Three types of electrolytic cell are available now. One-room small size cell will require only 25mL anode solution, helpful to cut back cost and waste.

Standard One-room Small

#### **Enhanced memory data capacity!**

Store results data on the USB memory stick and the stored data can be read out on the color display.

#### Two KF channels run in parallel -- Plug and Play!

Combining one additional KF station with either a volumetric or coulometric module enables two different measurements to be performed at the same time. With both a volumetric and coulometric channel, one can measure moisture over the entire range from 1ppm to 100% or double your sample throughput with 2 identical KF stations.

#### Intuitive control panel display!

Current status, data and function keys are displayed on a colorful and large screen. Color touch screen is 7.5-inches wide. All helpful and necessary information is always at hand!

#### Use less reagents!

Reducing expensive KF reagent consumption makes this more economical and ecological.

#### Browse data by PC on a LAN connection!

Result data with curves can be viewed on your PC internet browsing program without optional software.

#### **Built-in thermal printer!**

Easy paper loading. High resolution, clear printout.

## AQ-22005 KF Coulometric Titrator Standard Specifications

ITEM SPECIFICATIONS

Titration method Coulometric Karl Fischer titration method

Multitasking function Up to two KF titration stations

(Double coulometric channels or combination of coulometric and volumetric

channels)

End-point detection method AC polarization potentiometric detection method

Background correction Automatic correction (selectable ON/OFF)

Measuring range  $10\mu g H_2O \sim 99 mmg H_2O$ 

Accuracy  $CV \leq 0.3\%$ 

(1g of 1mg H<sub>2</sub>O/mL water-in-methanol measured 10 times)

Required measurement time FAST : 1.8mg  $H_2O/min$  (30 $\mu$ g  $H_2O$ )

MEDIUM :  $1.\overline{2}$ mg H<sub>2</sub>O/min ( $20\mu$ g H<sub>2</sub>O) SLOW : 0.6mg H<sub>2</sub>O/min ( $10\mu$ g H<sub>2</sub>O)

Electrolytic cell capacity Standard : 150mL (min.usage: approx. 100mL), two compartments

One-room : 150mL (min.usage: approx. 100mL), one compartment : 75mL (min. usage: approx. 25mL), one compartment

Memory data capacity Internal memory: 100 data / channel

USB flash memory (≥256MB): Max. approx. 9900 data

Calculation modes 6 modes corresponding to sample status and sampling methods

Printer Built-in thermal printer (paper width: 58mm)

\*Optional external printers:

Thermal printer PRINTY3 or Dot impact printer PR-302B

Touch panel screen 7.5 inch color graphics LCD

External input/output RS-232C: 1 port, LAN: 1 port, USB flash memory stick: 1 port

Interface for Evaporators: 1 port

Power supply AC100-240V, 50/60Hz, 100VA

Dimensions / Weight Main unit: 220(W) x 400(D) x 200(H) mm / Approx. 5kg

### AQV-2200S Karl Fischer Volumetric Titrator

AQUACOUNTER® AQV-2200S Karl Fischer Volumetric high-end titrator is the perfect choice for a very wide range from 100 ppm to 100% water content with its maximum capability for automation and future up-gradability.

#### **Features**

#### **Economical & Eco-friendly small-volume cell!**

Small-volume titration cell requires only 20mL of titration solvent for accurate measurements. Less reagent volume reduces waste and easy to replace with fresh solvent for the next measurement.

#### Two KF channels run in parallel -- Plug and Play!

Standard

Small

Combining one additional KF station with either a volumetric or coulometric module enables two different measurements to be performed at the same time. With both a volumetric and coulometric channel, one can measure moisture over the entire range from 1ppm to 100% or double your sample throughput with 2 identical KF stations.

#### Additional burets and buret-heads!

Compact additional burets and easy, snap-on buret-heads are useful for quick KF reagent exchange or back titration applications.

#### Intuitive control panel display!

Current status, data and function keys are displayed on a colorful and large screen. Color touch screen is 7.5-inches wide. All helpful and necessary information is always at hand!

#### Browse data by PC on a LAN connection!

Result data with curves can be viewed on your PC internet browsing program without optional software.

#### Enhanced memory data capacity!

Save & load parameters and results via USB flash memory.

#### **Built-in thermal printer!**

Easy paper loading. High resolution, clear printout.

AQV-2200S configured for two-channel capability.

## AQV-22005 KF Volumetric Titrator Standard Specifications

ITEM SPECIFICATIONS

Titration method Volumetric Karl Fischer reagent titration method

Multitasking function Up to two KF titration stations

(Double volumetric channels or combination of coulometric and volumetric

channels)

### AQ-300 Karl Fischer Coulometric Titrator

On a tight budget and looking for a reliable, easy-to-use coulometric Karl Fischer titrator?

Then look no further than the AQUACOUNTER® AQ-300. With state-of-the-art performance features, like a fritless cell option, the AQ-300 offers the same fast and accurate results you've come to expect from other AQUACOUNTER® products.

Comes with training movie CD, plasticized Quick-Start guide for use in the lab, paper and pdf manual. Also included, complete accessories, download software, RS-232 cable, and AQUACOUNTER® KF Reagent starter kit.

#### **Features**

- Six (6) built-in calculation modes accommodate solid, liquid and gas samples.
- · One-touch calculations including statistics package!
- Four (4) files of preset conditions can be stored in memory.
- Balance and computer interfaces for GLP and ISO documentation. Instant recall of data for up to 20 samples.
- · Built-in detector monitors titration status.
- · Choice of ion exchange membrane or fritted cell system.
- Choice of thermal printer or impact printer.
- Free software for downloading titration results to a laptop or PC; includes the correct RS-232 cable.
- · Competitive price.
- Complete accessories kit enables the end-user to run samples right out of the box. There is nothing else to purchase on start-up.

## AQ-300 KF Coulometric Titrator Standard Specifications

ITEM SPECIFICATIONS

## AQV-300 Karl Fischer Volumetric Titrator

On a tight budget and looking for a reliable, easy-to-use volumetric Karl Fischer titrator? Then look no further than the AQUACOUNTER® AQV-300. State-of-the-art performance features let you measure moisture content from low to high concentrations quickly and accurately.

Measurements are simple and routine with unsurpassed precision.

Comes with training movie CD, plasticized Quick-Start guide for use in the lab, paper and pdf manual. Also included, complete accessories, download software, RS-232 cable, and AQUACOUNTER® KF Reagent starter kit.

#### **Features**

- · Small footprint with integrated magnetic stirrer.
- · Function guide display allows simple operation.
- · Newly designed buret tip ensures precise titration.
- · Non-corrosive PBT (polybutylene terephthalate) resin body.
- · Two RS-232C ports for balance and PC.
- · Free software for downloading titration results to a laptop or PC; includes the correct RS-232 cable.
- · Competitive price.
- Complete accessories kit: Requires only dry methanol in order to run samples right out of the box. There
  is nothing else to purchase on start-up.

## AQV-300 KF Volumetric Titrator Standard Specifications

ITEM SPECIFICATIONS

Titration method Volumetric Karl Fischer reagent titration method

Titration control method 
Intermittent addition of titrant while approaching the end point.

(1) Control using a waiting interval timer of 1 - 99sec (INTERVAL).

Titration stops when there is no change in the electrode potential during

this interval.

(2) Control by titration timer. (T-TIMER: 1 - 99min.)

End point detection DC polarization potential difference detection

Buret capacity 10mL

Reproducibility ±0.01 mL (for full discharge, standard deviation for n=5)

Liquid contact material PTFE, ceramic and glass

Number of burets 1

Display screen 2 lines, 16 digit LCD with backlighting

Display units mL (min. display is 0.001mL), mg H<sub>2</sub>O, %, or ppm

Measuring range 10 ppm - 100%

Minimum volume of

titrant addition

0.005mL or 0.01mL

Calculation function Concentration, factor standardization, statistics, recalculation

Titration cell capacity 150mL

Minimum volume of solvent Approx. 30mL

External input/output Two RS-232C ports

Port 1 (HOST) for PC connection.

Port2 (BALANCE) for Balance connection.

Printers Optional thermal and impact printer - please inquire

Power supply / Power

consumption

Safety approval CE approved

## Karl Fischer Titrator Options

### Solid Evaporator EV-2000

The EV-2000 is designed for solid/powdery samples, which may not be soluble in the Karl Fischer reagent or solvents or may contain interfering substances. The EV-2000 works with all of our AQUACOUNTER® Karl Fischer titrator series. can be automatically controlled via the AQ/AQV-2200 titrators or via optional control key pad for the AQ/AQV-300 models and other brand of KF titrators.

AQ-2200S + EV-2000

### Oil Evaporator EV-2000L

The EV-2000L Oil Evaporator utilizes azeotropic distillation (Micro Dean & Stark Distillation). It completely separates water from sample matrices, thus eliminating any side reactions with interfering substances. The EV-2000L can be used with all AQUACOUNTER® Karl Fischer titrators, or any other manufacturer's titrators.

AQ-2200S + EV-2000L

## Automated Solid Evaporator System AQS-22010S (AQ/AQV-2200 + EV-2010)

The EV-2010 automated evaporator/sample changer can be connected with both the AQ-2200 coulometric titrator and the AQV-2200 volumetric titrator, which makes the AQS-22010S a complete, automated evaporation KF titration system.

#### For medium to heavy workloads

Up to 10 samples can be placed on the turntable at the same time. Up to 99 samples can be run by simply removing the finished sample and adding a new one.

#### **Extremely compact design**

A compact upright design for both the heating block and the KF titrator saves valuable bench space.

#### Wide temperature range and programmable temperature control

The heating temperature can be set up to 300 °C and programmed up to 3 steps. This feature makes it easier to find the optimum temperature for each individual sample, or allows you to differentiate surface water from bound water.

AQ-2200 + EV-2010

#### **Dry Air Pump (Optional)**

Compact, integrated air pump eliminates the need for nitrogen carrier gas or select a N<sub>2</sub> gas generator from JM Science.

## Automated Solid Evaporator System AQS-22320 Automated Oil Evaporator System AQL-22320 (AQ/AQV-2200 + SE/LE-320)

The AQS/AQL-22320 is an automated KF Titrator System that requires the analyst to load the samples into the glass vials and then place the glass vials on the sample tray of the system. The operator only needs to push the "start" button once to begin the analyses.

\*Chemical reagents are not included.

- Sample changer holds up to 20 vials.
- Equipped with Automatic KF reagent exchanging function.
- Wide temperature setting covers the full range of azeotropic points.
- · Reduces costs for KF reagent and waste disposal.
- Can process large numbers of samples.

ITEM	Solid Evaporator SE-320	Oil Evaporator L	E-320	
Number of sample vials	20 positions	20 positions		
Volume of sample vial	Max. 10mL	Max. 3 mL		
Seal	PTFE cap with Aluminum foil	PTFE cap with P	PTFE cap with PTFE septum	
Carrier gas	Nitrogen gas*	Nitrogen gas*	*Optional N <sub>2</sub> gas generator from JMS is recommended	
Carrier gas flow rate	30 - 300mL/min	50 - 300mL/min		
Carrier gas desiccant	Molecular Sieves	Molecular Sieves		
Heater	Aluminum block	Aluminum block		
Heating temperature	Room temperature to 300°C	Room temperatur	Room temperature to 200°C	
Power supply / Power consumption	AC100 - 240V, 50/60Hz, 150VA AC100 - 240V, 50/60Hz, 150VA		0/60Hz, 150VA	
Dimensions	Sample changer + heater unit: 350 (W) x 510 (D) x 390 (H) mm Valve unit: 275 (W) x 440 (D) x 280 (H) mm		• •	
Weight	Sample changer + heater unit: A Valve unit:	approx. 19kg approx. 9kg		

## Special Sampling Devices

#### NAME DESCRIPTION

1 Micro Solid Sampler For solid/powder samples. Sample size up to 3mL

2 Ultra - Micro Solid Sampler For solid/powder samples. Especially for very small amount of sample.

(sample size up to 0.17mL)

3 Grease Sampler For viscous samples such as grease

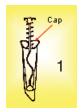

4 Gas Sample Foaming Tube A device for introducing a gas sample

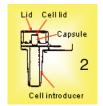

into the titration cell.

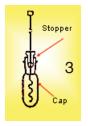

5 Liquefied Gas Sampler For liquefied gas sample.

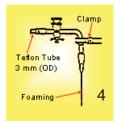

6 Sampler A container for powder or pellets.
Use with solid evaporator EV-2000.

## Reagents-Solvents-Standards

## Karl Fischer Reagents

AQUACOUNTER® Karl Fischer reagents have been carefully developed and optimized to meet the exacting demands of a wide range of moisture determinations. A complete selection of coulometric and volumetric reagents, water standards and dehydrated solvents are available to analyze moisture in a diverse array of applications. An extended shelf life assures a stable titre, rapid titrations and accurate results. AQUACOUNTER® reagents are manufactured in the USA, are pyridine-free and thus are less toxic with no unpleasant odors. Reagents are competitively priced and demo kits are available.

#### Water Standards

Although pure water can be used for calibration and validation, the amounts required may be difficult to weigh. We, therefore, recommend our volumetric and coulometric water standards available in standard 5 mL ampoules. Choose from 9 different standards for titre determination, for determining precision and accuracy or for validating KF titrators according to ISO 9000, GMP, GLP and FDA guidelines.

#### **Dry Solvents**

Dehydrated solvents for KF Titrators are available.

## Titrator Parts & Accessories

Several accessories are also available for your AQUACOUNTER® titrator or evaporator including a wide selection of electrodes, printers, cables, balances and sampling devices. Consumable parts like Ion exchange membranes, fluorine grease, rubber septa, indicator electrodes, 4M KCl are available from stock. Simply call or go to jmscience.com/titratorparts to order.

## Customer Service & Technical Support

Potentiometric and KF titrators are manufactured by the Hiranuma Company in Japan and have been sold in North America under <u>VARIOUS</u> brand names for more than 20 years. Titrator service and technical support are available for ALL Hiranuma titrators.

Call or send an email message to sales@jmscience.com.

## Mercury Analyzer

#### HG-400 Series

The HG-400 series is an automated mercury analyzer that achieves a 0.5 ppt detection limit based on Cold Vapor Atomic Absorption Spectrometer complying with EPA and other standard methods.

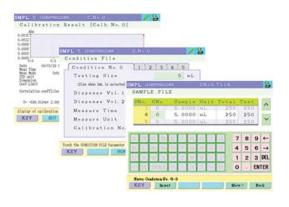

#### **Features**

#### High sensitivity - detection limit 0.5ppt.

Perfect for trace levels of mercury detection. The improved optical system and measurement flow path enables the analyzer to reach a lower detection limit of 0.5ppt of Hg.

#### User friendly - color touch screen.

A large 7.5 inch LCD color touch screen provides all the information that the analyst requires.

Touch lightly on the colorful, clear screen for easy control and analysis.

#### Comprehensive data handling.

Browse data on PC with LAN connection. Special software is also optionally available.

#### Expandable and flexible - widest variation of applications.

The HG Series is needed in the following settings:

- Water Treatment Plants
- Laboratories
- Steel / Light Metals
- Food

- Government Testing Facilities
- Chemicals
- Pharmaceuticals
- Electrical & Electronics

#### HG Series is more cost effective and environmentally friendly.

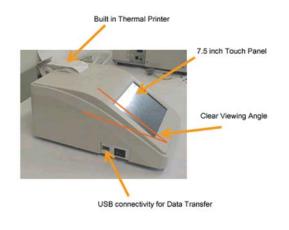

- · Smaller sample sizes are needed
- · Minimal chemical reagents
- · Less waste

#### Compact design.

Built-in printer saves more valuable bench space.

#### GLP compliant functions.

Helpful system maintenance information provided.

## HG-400 Mercury Analyzer Standard Specifications

#### **ANALYSIS UNIT**

ITEM SPECIFICATIONS

Measurement method Cold vapor atomic absorption spectrometry

Testing size 5-mL

Detection range 0 - 500ng / 5mL (0 - 100 ppb)

Lower detection limit 0.5 ppt

Mercury collection method Collection by activated charcoal

Light source Low pressure mercury lamp

Measurement mode Peak height mode / Integration mode

Printer Built-in thermal printer (paper width: 58mm)

Power requirement AC100-240V, 50/60Hz, 30 VA

Dimensions 220 (W) x 400 (D) x 220 (H) mm

Weight Approx. 12kg

HG-400-5D

HG-450-5D shown w/ PC

#### MAIN CONTROL UNIT

#### ITEM SPECIFICATIONS

Printer Built-in thermal printer (paper width: 58mm)

Touch panel screen 7.5 inch color graphics LCD

Power supply AC100-240V, 50/60Hz, 30 VA

Dimensions 220 (W) x 400 (D) x 150 (H) mm

Weight Approx. 4kg

#### C-430-5 SAMPLE CHANGER

#### ITEM SPECIFICATIONS

Testing size 5-mL

Number of measurements 30 specimens

Power Supply AC100-240V, 50/60Hz, 30 VA

Dimensions 240 (W) x 380 (D) x 370 (H) mm

Weight Approx. 12kg

#### **Options**

- Sample changer C-430-5 for 5-mL test volume, 30 positions, rinsing bath is equipped.
- PC software "Hg-Net Viewer" for viewing and editing data stored in USB flashmemory on PC.
- Mercury Analyzer HG-450 PC controllable type is also available.
- Reagent dispenser D-401 to automatically deliver sulfuric acid and tin chloride solution.
- **Dot impact printer PR-302B** chart paper, paper width 58mm.

## Salt Analyzer

#### CLD-100

The new CLD-100 Salt Analyzer achieves speedy and accurate determination of chloride ions by coulometric titration method.

#### **Features**

Easy maintenance.

#### No standardization of reagent required.

No troublesome maintenance work such as reagent filling into flow-path and the dispenser is as required in volumetry.

Simple operation with an injection by micro syringe.

#### **High Speed Measurement.**

Rapid measurement is achievable (measure  $20\mu\text{L}$  of 1% NaCl standard in only 20 seconds!). Colored samples can also be accurately measured easily using the potentiometric End-Point Detection method.

Electrolyte, micro syringe and NaCl standard solution included.

#### Low running cost.

The reusable electrolyte can be used for several measurements thus achieving real cost savings. (approx. 100 measurements of  $20\mu$ L of 1% NaCl).

#### Design & materials have been adopted for safety.

Mercury-free and trouble-free sleeve-type reference electrode is adopted for safety.

#### **Options**

Thermal printer PR-2000T2

Dot impact printer R-302B

## CLD-100 Salt Analyzer Standard Specifications

#### ITEM SPECIFICATIONS

Measurement method Coulometric Titration Method

End point detection method Potentiometric detection detection method

Electrodes Indicator electrode: Silver electrode

Reference electrode: Silver sulfate electrode

Measured components NaCl or Cl- \*selectable

Concentration units % (w/v, w/w), mg/L, mmol/L

Data storage capacity 300 results

Calibration 1-point calibration using NaCL standard solution

Sampling 20-µL micro dispenser

Measurement ranges / Sample sizes Range 1: 1.0000 ~ 50.00 % 0.002mL

Range 2: 0.2000 ~ 10.00 % 0.010mL
Range 3: 0.1000 ~ 5.000 % 0.020mL
Range 4: 0.0500 ~ 2.000 % 0.050mL
Range 5: 0.0200 ~ 1.000 % 0.100mL
Range 6: 100.0 ppm ~ 5000 ppm 0.200mL
Range 7: 40.0 ppm ~ 2000 ppm 0.500mL
Range 8: 20.0 ppm ~ 1000 ppm 1.000mL

Power requirement AC100-240 ± 10V, 50/60Hz, 50VA

Dimensions 310 (W) x 270 (D) x 300 (H) mm

Weight Approx. 5kg

The CLD-100 Salt Analyzer was awarded Laboratory Equipment's 2010 Reader's Choice Award in Analytical Instruments.
