

Let's find your ring size!

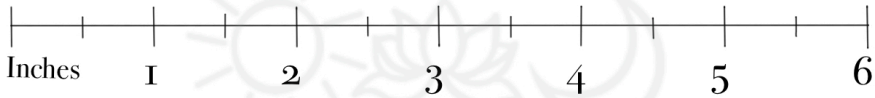

you will need access to a printer, ruler, + scissors

step 1:

download and print this form

step 2:

use your ruler to ensure that the ruler on our sheet matches yours and is correct to scale

step 3:

cut out the ring sizer, making sure to also cut a slit along the dotted line under "your size".

slip the pointed end of the sizer through the slit to create a loop and slip onto desired finger.

pull on both ends to tighten and determine where you would want your ring to fit.

make sure it is a snug fit but still able to go over your knuckle!

having trouble?

we have plastic ring sizers available for purchase.
