

FINISHES & GEMSTONES

MODERN MATTER FINISHES

Our finish swatches are a great tool to help you make your final hardware selection. All swatches are made of solid brass, showcasing each of our hand applied finishes. Due to the nature of our hand finishing process, some products such as those with a hand-applied patina will have lot-to-lot variations as to color and/or finish.

**POLISHED BRASS
(PB)**

Solid brass, expertly polished to a high sheen. This has a lacquered finish.

**BURNISHED BRASS
(BB)**

Hand polished brass finished with darker oxidized patina added for highlights and an aged feel. This is a living finish.

**ANTIQUE BRASS
(AB)**

Hand polished brass, lightly distressed and brushed to add a vintage feel. This has a lacquered finish.

**SATIN BRASS MATTE
(SBM)**

Hand polished brass, wire brushed for a soft satin gold finish. This has a lacquered finish.

**ANTIQUE PEWTER
(AP)**

Solid brass hand distressed and lightly brushed to add a slightly aged feel. This has a lacquered finish.

**DARK BRONZE
(DB)**

Solid brass with a hand applied dark bronze finish with gold undertones. This has a lacquered finish.

**PATINA
(P)**

Hand polished brass, with burnished finish and a light dusting of verdigris applied to recess areas. This is a living finish.

**POLISHED NICKEL
(PN)**

Polished solid brass base, finished with a soft nickel plating reminiscent of the finest silver. This has a lacquered finish.

A living finish is when brass naturally oxidizes over time changing the finish of your product. This change can create a beautiful aged patina.

A lacquered finish has a protective organic coating that forms a protective layer between the brass and the environment to prevent the oxidation process and the finish changing over time.

MODERN MATTER GEMSTONES

Modern Matter offers product customization that combines hand applied finish options with more than twelve semi-precious and natural gemstone options. Custom gemstones available upon request.
