

# TIM™ Makeup Technique Face Chart

## STEP 1

**Felt Tip Liner** - Hold the pen horizontally. Then rest the tip on your lashes and press it into the seam between your eyelid and lash line. Draw a very thin line from one corner of your eye, to the other.

**Matte Shadow** - Use the **Sable Angle Brush** to “dot and drag” shadow over the Felt Tip Liner line.

## STEP 2

**Mineral Sheer Tint** - Use the **Stipple Brush** to apply sheer tint to your face and neck. Place 1-2 pumps of product on end of brush and deposit on forehead, cheeks, jaw, and neck using a stipple motion, then go back and use a sweeping motion to blend.

## STEP 3

Use the **Kabuki Brush** to apply **Contour Bronzing Powder**:

- Sweep the Kabuki Brush into the Contour Bronzing Powder and blend the powder into the brush by pressing it into your wrist or a tissue.
- Apply the powder to the corners of your forehead using a circular motion and blend into your hairline.
- Position the brush so the bristles are on and below your cheekbone. Apply the powder by following a straight line in from the middle of your ear toward your nose.
- Lastly, apply the powder under your jawbone and on your neck.

## STEP 4

Apply **Lipstain** and let dry, then apply **Luxury Lip Gloss**.

**TIP: Hang the TIM™ Makeup Technique Face Chart on your mirror until you have the technique memorized!**
