

## **Grill Feature Installation Instructions**

Thank you for purchasing the grill feature for our Burly Fire Pit. Below are pictures and step by step instructions for installation and use:

*The grill feature comes with a Flange Mount and Grill Post attachment. All parts are made out of 304 stainless steel.*

### **Step 1**

Unscrew the "L" Shaped Hex Tool from the Flange Mount.

### **Step 2**

Attach the rectangle plate to the grill using the Hex Tool. (Note: This step might have already been done for you.)

### **Step 3**

Use the Hex Tool to unscrew the plate from the rest of the Flange Mount.

### **Step 4**

Hold the narrow plate under the Flange Mount and use the Hex Tool to tighten the bolts.

### **Step 5**

Insert the Grill Post attachment and re-attach the Hex Tool.

**\*Note:** *The Hex Tool is also used for adjusting the Grill Post attachment.*

### **Important Grill Feature Information:**

- Do not over tighten bolts while screwing in the grill feature into the fire pit.
- The grill feature is designed to swivel on and off the fire.
- The height can also be adjusted for temperature control.
- Make sure to use our heat rated gloves to make adjustments while the fire is hot.
- Our poker also works well to swing the grate on and off the fire.
- We do not recommend attaching or removing the grill feature while the fire is lit.

*Please enjoy and look for open fire pit recipes from Burly in the future.*
