GETTING STARTED

The experienced staff at Pravada is ready to help you determine the best options and solutions for your professional skin and hair care lines. The following provides a basic outline of the steps we follow with each client.

1

PROJECT DEFINITION

In this phase you will meet with one of our Project Consultants- either in our showroom or by phone. In this meeting we will review your project, your brand, and your time line. Our focus is to ensure we understand your vision and goals for your customers and your business.

Based on your objectives and budget, we will help you identify the best product selection for your skin and hair care lines. We encourage you to test our natural and organic botanical based products. If we don't offer what you are looking for, we will work to source products from our roster of registered, high quality suppliers.

PACKAGING + LABELING

- **IN-HOUSE PRAVADA PRINTING**
- **DIGITAL PRESS PRINTING**
- **SILK SCREENING**

IN-HOUSE PRAVADA PRINTING

Pravada labels are printed in-house on our stock white, semi glossy, water resistant polyester labels with rounded corners. Our in-house labels can be printed in full color or black and white. Minimum order quantities are 12 pieces and turnaround times are about 1-2 weeks after designs are provided or approved by the client. There are additional fees if a press proof is requested. A request for a proofs may increase lead-times for full production. Costs for Pravada labels are included in the cost of the product. Artwork must be setup and created using the Pravada label templates. Most packaging will have individual front and back labels and wraparound labels can be used on certain 1oz or 2oz packaging.

DIGITAL PRESS PRINTING

This high quality printing process produces a variety of labels. Choose from glossy or matte laminate finishes on white, clear, or metallic stock. They are water and oil resistant and have rounded corners. Minimum order quantities are 250 pieces per label, and turnaround times are about 1-2 weeks after designs are provided and order quantities/quotes are approved by the client. There are additional fees if a press proof is requested. Press proofs have a turnaround time of 1-2 weeks, increasing the overall production time. Costs are determined by label size, material, quantity and design. There may be additional plate or custom die-cut fees due to the print method and label size or shape.

SILK SCREENING

In this printing method, the design is transferred directly onto the packaging. This method of printing may have a limit of 1-2 colors. The more colors used the more expensive the cost. Silk Screening has a minimum order of 1000 pieces per product. There are additional fees if a proof is requested. Proofs have a turnaround time of 3-5 weeks, increasing the overall production time. Artwork must be reviewed by printer to see if it is suitable for silk screening. Final costs are determined by print area, colors, quantity and design.
