

Here's how you measure your wrist size

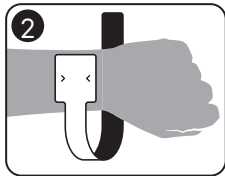

Print this page at 100%. Make sure you don't scale to fit. After you've printed this page, place a credit card in the box below to confirm the scale.

1 Cut the tool on the right and position the wider end on the center of your wrist.

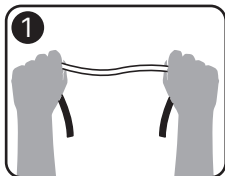

3 Determine your wrist size on the printed ruler.

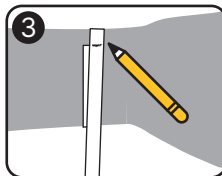

2 Tightly place the cut out around your wrist.

No printer on hand?

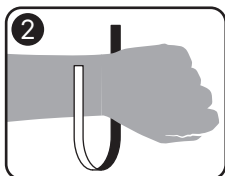

Don't worry if you don't have a printer available. Grab a long piece of paper, or a cord and proceed with these instructions.

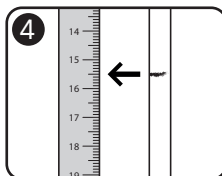

1 Find a long piece of paper or a cord or anything else that fits around your wrist.

3 Mark the place where it overlaps.

2 Wrap it around your wrist tightly.

4 Place the strip next to a ruler and measure the length.

Note: You may enter your measurements in inches, if you don't have a metric ruler on hand
