

## ezpz Mini Line + Developmental Milestones

### ezpz Mini Utensils

Learning to self-feed is an important developmental milestone, and the ezipz Mini Utensils are designed to help toddlers learn how to eat with a spoon (scooping) and fork (piercing). **(12 months +)**  
*Designed by a Pediatric Feeding Specialist (Dawn Winkelmann, M.S, CCC-SLP)*

#### Milestones

##### **Able to bring spoon + fork to mouth (palm up)**

- Short, fat, round silicone handles makes grasping and movements to the mouth more successful

##### **Able to scoop food using a utensil**

- Strong nylon head improves a toddler's scooping + piercing ability

### ezpz Mini Cup + Straw Training System

The Mini Cup + Straw Training System teaches toddlers to independently drink from both an open cup and a straw. These feeding milestones support oral and speech development, aid with teething, decrease tooth decay and help your toddler develop a safe swallow. **(12 months +)**

*Designed by a Pediatric Feeding Specialist (Dawn Winkelmann, M.S, CCC-SLP)*

#### Milestones

##### **Able to drink from an open cup independently (with some spillage)**

- Interior angle provides an even flow for a safe drinking position

##### **Able to sip from a straw cup independently**

- Sensory bumps and straw angle help facilitate a safe swallow

### ezpz Mini Mat

The Mini Mat is an all-in-one placemat + plate that suction to the table or highchair tray. The mat's stable base reduces tipped plates and helps infants + toddlers learn to self-feed. **(6 months +)**

#### Milestones

##### **Able to finger-feed soft foods**

- Stable base of the mat promotes self-feeding

##### **Able to use a true pincer grasp**

- Toddler can practice a "pincer grasp" (using tips of index finger + thumb) to hold or dip foods into Mini Mat's eyes
