

## Kurzanleitung **SHUTTER**

### **LIGA.AIR.STO.240 & LIGA.AIR.STO.2T.240**

Bluetooth 4.0 | Controllable with CASAMBI App

Version 1.1 / 01.04.2020

**LIGA AIR**

LICHTTEAM AG  
Stationsstrasse 89  
6023 Rothenburg  
[www.lichtteam.ch](http://www.lichtteam.ch)

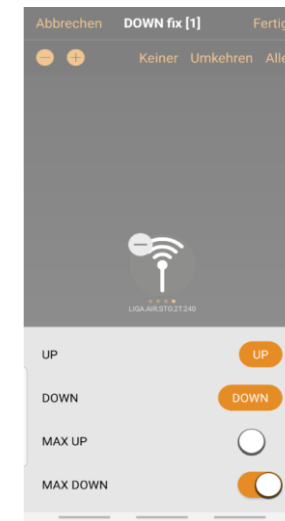

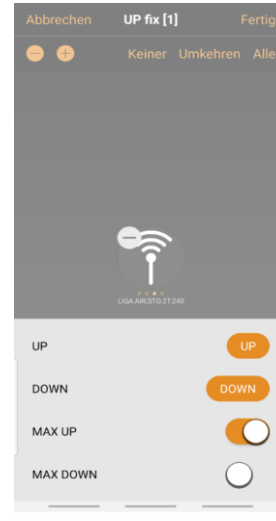

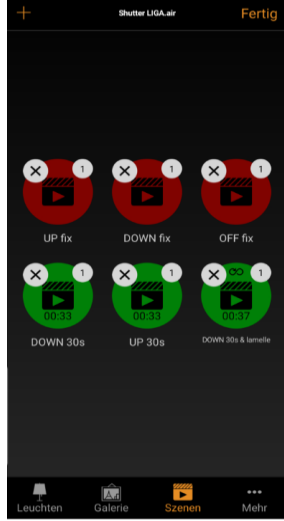

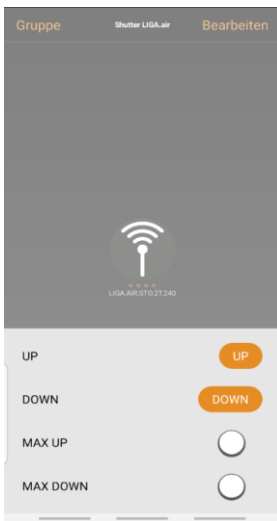

## IMPORTANT INFO

The LIGA.AIR.STO.240 is wired and has no buttons on site for operation, can be mounted directly on a blind plug

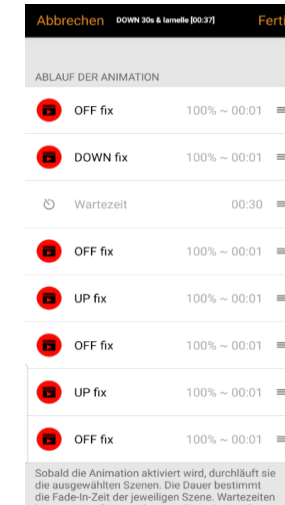

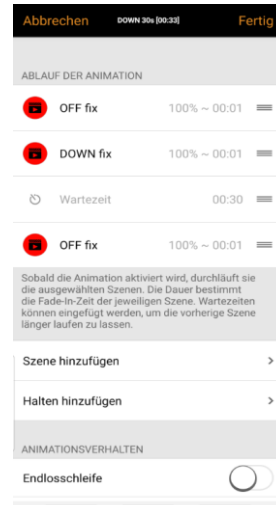

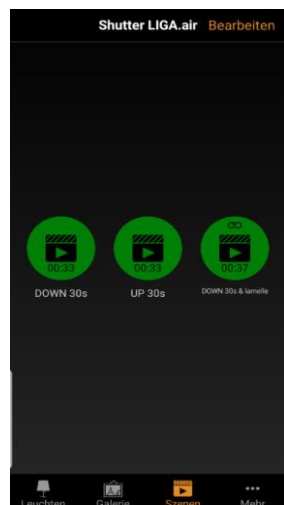

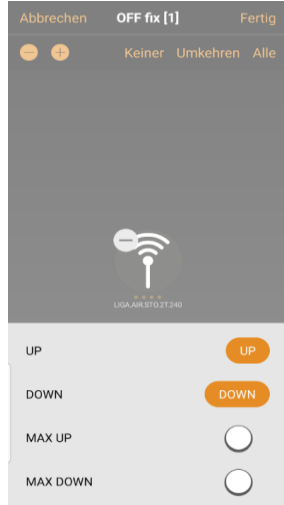

The LIGA.AIR.STO.2T.240 is made with stranded wires and has two buttons on site to operate the shutter up and down.

Here is a module, described how to program the scenes and animations on the CASAMBI APP

Write three scenes "UP fix" / "DOWN fix" and "OFF fix", hide them so they are not visible on the user interface.

Before a command is given by the animation, a "fix OFF" command must be given to ensure that the module does not have a pending permanent command.
