Constant Voltage LED Power Supply SCL100-12VF/SCL100-24VF SCL100-48VF

Product description

The SCL100 series is a constant voltage LED driver for indoor . Its input voltage range is 198-264Vac, with a conversion efficiency of up to 93%. It adopts a fanless design and works at -20°C~+45°C. Naturally cooled chassis temperature range, ultra-high power factor, ultra-low total harmonic distortion, low standby power consumption, and all-round protection functions not only greatly improve the reliability of the product, but also ensure the product life cycle. This series of products is designed for LED lighting design and is used in indoor and outdoor lighting. Suitable for various application environments in almost all indoor places where LED lamps can be installed. Comply with CASAMBI dimming standard. Innovative thermal management technology intelligently protects power supply life.

Standards

EN61347-1

EN61347-2-13

EN61547

FN55015

EN61000-3-2

EN61000-3-3

EN62384

EN62493

Characteristics

- European AC input range (220-240VAC)
- With active PFC function
- Waterproof rating IP20
- CASAMBI dimming driver
- Built-in press dimming function
- Dimming range 1-100%
- Suitable for dry indoor environments
- Protection type: short circuit/over temperature/over voltage protection
- Plastic case
- Comply with world lighting equipment safety regulations
- 5 years warranty

Specifications

Model		SCL100-12VF	SCL100-24VF	SCL100-48VF		
	turn on time(S)	<0.5	<0.5	<0.5		
	output power(W)	100	100	100		
Output	output voltage(V)	12	24	48		
	output voltage tolerance	≤±5%	≤±5%	≤±5%

- 1. Tolerance: including setting tolerance, linear adjustment rate and load adjustment rate.
- 2. Tested under full load and 230Vac. Refer to the "Power Factor" and "Efficiency" graphs.
- 3. To calculate the average efficiency of the product, test the voltage at 100%, 75%, 50%, and 25% of the rated current, and then obtain the average of the four values through the arithmetic mean method.
- 4. All parameters not specifically mentioned are measured at rated voltage input, rated load and 25°C ambient temperature.
- 5. A power supply is a component used in conjunction with the final device. Since EMC performance will be affected by the complete installation, the final equipment manufacturer must reconfirm that the equipment after complete installation complies with the EMC directive.

PUSH push-type dimming (PUSH dimming only requires a single connection, and when multiple units are dimmed collaboratively, only APP settings are required).

Dimming: long press (dimming).

Switch: short press (ON/OFF).

Note

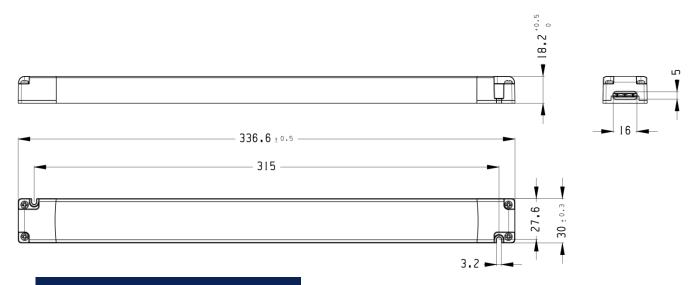

The frequency range is approximately 2402-2483 MHz, and the frequency is optional when establishing a network on the APP;

The transmitter power is 4dBm-8dBm, which is set at the factory and defaults to 8dBm. The official recommendation is maximum;

Encrypted information is not available. Casambi focuses on professional lighting control and security.
