

basicDIM Wireless Outdoor

Casambi Ready wireless modules

Product description

- _ Can be integrated in Casambi systems (Casambi Ready)
- _ Wireless controllable with an Android / iOS smart device
- _ No need for an external gateway device
- _ Forms automatically a wireless communication network with up to 250 nodes
- _ Digital output to control IEC 62386 compatible drivers
- _ Supplied via IEC 62386 compatible power supply
- _ Integrated light sensor
- _ Support for Tridonic PSensor and MSensor
- _ Ready for Zhaga book 18 receptacle for easy and flexible installation to luminaire
- _ Device firmware can be updated over-the-air
- _ Can be used as repeater to extend the coverage of the wireless signal
- _ Lifetime up to 100,000 h at $t_c = 72\text{ }^\circ\text{C}$
- _ 5 years guarantee (conditions at <https://www.tridonic.com/manufacture-guarantee-conditions>)

Housing properties

- _ Casing: Transparent smoke grey
- _ Type of protection IP66
- _ Impact protection \leq IK09

Typical applications

- _ Outdoor installations: parking lots, access roads, parks, etc.

basicDIM Wireless Outdoor

Casambi Ready wireless modules

Dimensions without dust and dirt protection

Dimensions with dust and dirt protection

Ordering data

Type	Article number	Packaging, carton	Weight per pc.
basicDIM Wireless OTD	28004237	30 pc(s).	0.068 kg

Technical data

Supply voltage ^①	9,5 – 22,5 V
Current draw	13 mA (30 mA at start)
Typ. power consumption ^②	0.16 W
Mounting hole	acc. to Zhaga Book 18 Ed. 3
Type of installation ^③	Zhaga Book 18 Ed. 3 socket
Max. cable length	3 m
Detection angle for light measurement	0° – 150°
Detection range for light measurement	0.5 – 4,000 lx
Radio transceiver operating frequencies	2.4 – 2.483 GHz
Max. output power radio transceiver (E.I.R.P.) ^④	< + 20 dBm
Max. radio range ^⑤	150 m
Radio protocol	Bluetooth 4.0
Capable for mesh network	Up to 250 nodes
Interface	Digital interface according to IEC 62386
Ambient temperature t_a	-40 ... +70 °C
t_c point	72 °C
Storage temperature t_s	-40 ... +85 °C
Vent humidity range	0 – 90 %
Dimensions Ø x H	Ø 79.7 x 38.5 mm
Diameter with dust and dirt protection	Ø 82.7 mm
Height with dust and dirt protection	43.4 mm
Housing material top	PC polycarbonate
Housing material body	PBT
Housing colour top	Transparent smoke grey
Housing colour body	Grey
UV resistance	f1
Type of protection	IP66
Impact protection rating	≤ IK09
Lifetime	up to 100,000 h
Guarantee (conditions at www.tridonic.com)	5 Year(s)

Approval marks**Standards**

EN 55015, EN 55022, EN 55032, EN 61347-1, EN 61347-2-11, EN 61547, EN 62479, EN 62493, ETSI EN 300 328, ETSI EN 301 489-1, ETSI EN 301 489-17

① Use only IEC 62386 compatible power supply.

② At 16 V supply voltage.

③ Device must be installed on top of the luminaire.

④ E.I.R.P.: Equivalent Isotropically Radiated Power.

⑤ With line of sight, clear sky and mounting height > 4 m.

ACU Z18 Set

Accessory

**Product description**

- _ Set consisting of receptacle, lock washer and mounting nut (ACU Z18 REP 4PIN)
- _ Designed for street lighting control
- _ Compliant with Zhaga Book 18 Ed. 3
- _ Optional IP66 with sealing cap (ACU Z18 CAP IP66)
- _ UL UV-f1 rated for outdoor use
- _ IK09 high impact resistant
- _ For more details see data sheet ACU Z18 Set

Housing properties

- _ Casing receptacle: PBT
- _ Type of protection IP20

Interfaces

- _ Supplies Zhaga Book 18 Ed. 3 contact system

1.1 Glow wire test

according to EN 61347-2-11 with increased temperature of 850 °C passed.

2. Common

2.1 Description

The basicDIM Wireless OTD is a Bluetooth device with integrated light sensor.

The module is powered by a IEC 62386 compatible power supply.

The module is connected to one or more compatible drivers.

A combination with a Tridonic push-button interface (DALI XC G3) or the Tridonic PSensor for simple integration of daylight control and motion detection is possible.

Use of the module with a wired DALI line with wireless luminaires, sensors and push-buttons is feasible when using the basicDIM Wireless OTD as a Gateway.

The processing of the digital commands is done by a application controller (e.g. sceneCOM evo or sceneCOM s). The transfer of these commands takes place from the Bluetooth network through the Gateway to the wired bus line. In both cases, the controlling capabilities and restraints of the used device profiles has to be checked before.

All basicDIM Wireless devices can be controlled with the Tridonic app "4remote BT". The app can be downloaded free of charge from the Apple App Store and Google Play Store.

2.2 Operation

The basicDIM Wireless OTD module is fully compatible with networks which support up to 250 nodes (Evolution networks).

If the module is used with different types of basicDIM Wireless devices in an Evolution network, their compatibility has to be checked before.

Multiple devices automatically form a mesh network that can be controlled from any point. These networks communicate wirelessly directly with the smartphone or tablet. Therefore, an external gateway or wireless LAN network is not needed.

basicDIM Wireless devices have an integrated 2.4 GHz antenna.

For optimum RF-performance, a special attention will have to be given when the device is integrated into a luminaire.

See chapter 6.2 Placement for further instructions.

basicDIM Wireless devices can be used very flexible for different use cases. The operating modes (profiles) can be changed in the 4remote BT app.

3. Thermal details and lifetime

3.1 Expected lifetime

Expected lifetime		
Type	ta	70 °C
basicDIM Wireless OTD	tc	72 °C
	Lifetime	>100,000 h

The device is designed for a lifetime stated above under reference conditions and with a failure probability of less than 10 %.

4. Interfaces / communication

4.1 Digital output

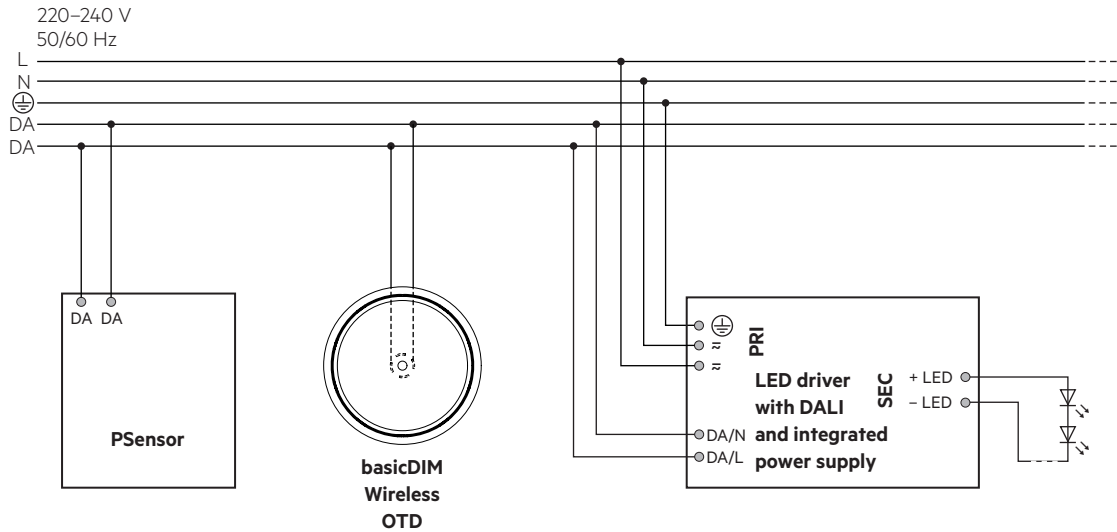

The basicDIM Wireless OTD module draws its operating power directly from the bus. Ensure the supply of the external bus with a IEC 62386 compatible power supply.

4.2 Status LED

Orange LED lights permanently during operation.
 Green LED flashes when „Identify“ is activated in the Tridonic app "4remote BT".

5. Installation / wiring

5.1 Wiring diagram with PSensor and internal bus supply

5.2 Wiring diagram with an internal bus supply

5.3 Wiring diagram with an external bus supply

* Max. 4 single / group addresses (A0 ... A3 / G0 ... G3) controllable, depending on the device profile of the basicDIM Wireless module. The rest of the connected drivers can be controlled via broadcast – depending on the device profile.

6. Installation basicDIM Wireless OTD

It is supplied directly via the bus.

- The digital interface is not SELV.
The installation instructions for mains voltage therefore apply.
- For a correct basicDIM Wireless OTD operation use the device only within the ta window.
- Ensure correct assembly and locking of the basicDIM Wireless OTD.
- Other RF signals may cause disturbances to the basicDIM Wireless OTD communication.

OTD system overview:

The basicDIM Wireless OTD is optimized to be used in combination with Tridonic PSensor and the Streetlight LED driver PRE3 with internal power supply.

Following illustration visualizes the wiring of the components inside the luminaire.

Maximum allowed wire-length for the bus is 3 m.

The basicDIM Wireless OTD supports the Zhaga connectivity standard for Plug&Play luminaire extensions. This allows a toolless and flexible integration in luminaires.

The connection interface is designed according to Zhaga Book 18 Ed. 3.

Pin assignment RFNode

Pins	Assignment
Pin 1	not connected
Pin 2*	DA-
Pin 3*	DA+
Pin 4	General I/O, not connected

Use the same pin assignment for the Zhaga connector pins mounted in the luminaire.

6.1 Mounting on luminaire:

! The basicDIM Wireless OTD must lock. Make sure that the dust and dirt protection, is not bent, no foreign parts between the seal and the fixture housing are located and that the protection fits the fixture.

6.2 Placement

Maximum radio range may be reduced if objects are located between the RFNodes or the RFNode is covered with dirt, dust, foliage and other impurities.

Max. radio range:

! The range of the radio signal depends on the environment, weather conditions and installation height. The influence of e.g. buildings, trees or bridges between the individual RFNodes as well as specific weather conditions such as rain and snow must be checked and accepted on site.

! To ensure a good radio connection, do not cover the basicDIM Wireless OTD with any materials!

7. Sensor function

7.1 Light measurement

The light measurement is detected in an angle of 150°. The light sensor is located in the middle of the module.

8. Miscellaneous

8.1 Disposal of equipment

Return old devices in accordance with the WEEE directive to suitable recycling facilities.

8.2 Conditions of use and storage

Humidity: 0% up to max. 90%,
not condensed

Storage temperature: -40 °C up to max. +85 °C

The devices have to be acclimatised to the specified temperature range (ta) before they can be operated.
