News Story

Decentralized Energy

- * Electricity production at or near the point of use, irrespective of size, technology or fuel used - both off-grid and on-grid

World Alliance For Decentralized Energy (WADE)

Interesting group - mostly commercial applications - lot of interesting material on their site.

The term 'DE' may be relatively new, but the concept is as old as commercial electricity. The very first power plant in the world, in New York City in 1882, provided both electricity and useful heat to the neighboring buildings.

HOLIDAY SALES!
