

Futurete

HORIZONT

"HAND-MADE IN PORTUGAL"

DIPACCI

The Futurete Horizont is the perfect machine for a portable commercial setting, with the ability to run from a tank or plumbed into mains water. The Horizont only requires 10amp power to run which makes it perfect to run anywhere. Futurete Horizont has compact design making it perfect for a food truck, coffee cart or portable events.

FEATURES

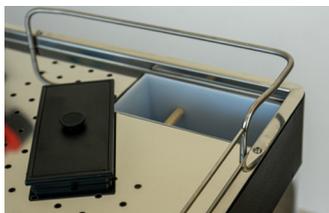

VOLUMETRIC CONTROLS

The Futurete Horizont acquires programmable volumetric buttons to precisely measure the extraction of water and coffee ratio.

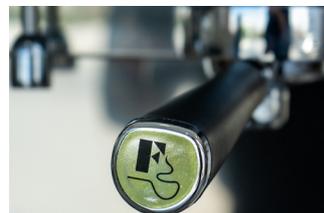

HIGH CUP DESIGNS

The Futurete Horizont is fully equipped with a high cup drip tray for the extra large cup drinker and also comes with removable high cup drip trays for the Piccolo lover.

TANKED/ OR PLUMBED

The Horizont is a flexible commercial machine that has the ability to be installed through water mains, flow jet simulator or utilise a 5L water tank.

E61 GROUP HEADS

This beautiful stainless steel machine comes with E61 group heads, fitting the standard group portafilter. Single and double spout heads for even extraction.

LOW POWER USE

The Futurete is a great power saver, meeting the requirement for off-grid use at 10Amp power, adopting a more convenient and portable set up for any coffee business.

COST EFFECTIVE

The Horizont is priced very competitively especially when compared to the latest machines on the market. Horizont is our first machine that is available in a package.
