2. Turn the handle and twist the filter head and rotate 1/4 turn clockwise to remove the old cartridge and firmly insert.  
3. From here the filter is ready for use or an alternative filter head.

FOR MAINS WATER SUPPLY

# Z Series

## Inline Undersink Filters

The Z Series filters particles including Chlorine, Sediment, Giardia, Cryptosporidium cysts & Trihalomethane (THM's) through its 3 stages of filtration. It will connect to your existing mixer tap and will filter your whole cold water supply.

### Filter Systems

#### Puremix Z7

The Z7 is a 1 micron, 15", filter designed for low pressure, high sediment applications which makes it ideal for mains, rain, harsh and rural water supply. The Z7 inhibits scale and bacterial growth in the cartridge.

#### Puremix Z6

The Z6 is a 0.1 micron, 15", filter designed for low sediment mains water applications. Ultrafiltration filters out bacteria such as E. coli.

#### Puremix Z2

The Z2 is 1 micron, 10", filter designed for applications with low undersink space. Ideal for bathrooms removing chlorine for drinking water and teeth cleaning.

#### Z2-HFR

The Z2-HFR is a filter replacement kit that will replace most existing undersink filters with a 1 micron, 10", Z2 cartridge.

### Cartridges

#### Z8-R

The Z8-R is a 0.5 micron, 15", cartridge that inhibits scale build up and reduces lead from contaminated water supplies.

#### Z1-R

The Z1-R is a 0.1 micron, 10", cartridge designed for low sediment mains water applications. Ideal for DFU taps, the Z1 will filter out bacteria such as E.Coli.

*\*Warranty applies to filter systems and excludes cartridges*
