

**in-line tank filter  
for coffee machines!**  
Available for almost all  
brand name devices.

# **bestcup** User Guide

best water technology

**Overview** **bestcup** is your first choice for coffee water to fulfil even the highest requirements. Designed for small scale use the **bestcup** is a filter cartridge system for coffee machines with integrated water tanks in the home or office. **bestcup** reduces the carbonate hardness in the water and ensures clear, particle-free coffee water with no foreign tastes or odours. Valuable minerals are retained and guarantee optimal aroma and a perfect crema for espresso specialities.

**bestcup T, S, M, L** are filter cartridges utilizing the same filter media but are of varying size and volume. All these cartridges fit into the

**bestcup** standard adaptor which is secured in the water tank with a handy suction cup.

**bestcup WHITE, SAPHIR, BLUE** are filter cartridges designed for use in specific machines and come complete with adaptors/ connectors required.

**Installation** **bestcup** filters come with a User Guide. Simply connect the **bestcup** standard adaptor to the intake water line. Place the adaptor within the tank, allowing enough room for the filter cartridge. Push the filter cartridge into the adaptor base and the system is ready to use

Notes: Descale the coffee machine before

using **bestcup** filters. For use in cold potable water only. Top up the water tank regularly, empty and clean tank on scheduled basis. Change the filter according to Capacity chart – maximum life 3 months.

**Capacity** The capacity or life of the **bestcup** filter is determined by local water hardness and the volume of water used. Use the handy tables to determine the estimated life of the **bestcup** filter in your application – either by cup volumes/serves or by total litres. For specific regions with poor water quality a water hardness test should be done to calculate capacity.

**bestcup** standard adaptor

## Optimal coffee water to fulfil even the highest requirements

Highest quality coffee water ensures optimal coffee enjoyment and protects high-quality machine technology.

The unique water optimization with bestcup professional technology offers targeted reduction of carbonate hardness (scale content) in the water and provides clear, particle-free coffee water free from unpleasant tastes or odours. bestcup technology ensures highly efficient protection against scale deposits in the coffee machine and improves the taste of espresso and coffee specialities.

Valuable minerals remain in the water and ensure optimal aroma and perfect crema.

bestcup professional technology offers all-round protection for your machine and guarantees optimal enjoyment for all coffee connoisseurs and espresso fans.

### bestcup in-line tank filter

Compatible with a wide range of coffee machines, including JURA®, Lavazza®, Saeco®, ILLY® and many other brands.

### bestcup fulfils the expectations of even the most discerning coffee connoisseurs and hobby baristas:

Protects your coffee machine from scale deposits

- ensures long service life of high-quality coffee machine technology

Guarantees optimal and consistent coffee quality

- perfect coffee aroma for satisfied coffee connoisseurs

Highest level of efficiency with large filter capacities

- with professional 4-level filtration

Simple to use with no complicated setting procedure

- for quick and easy filter change

### Simple use in the water tank

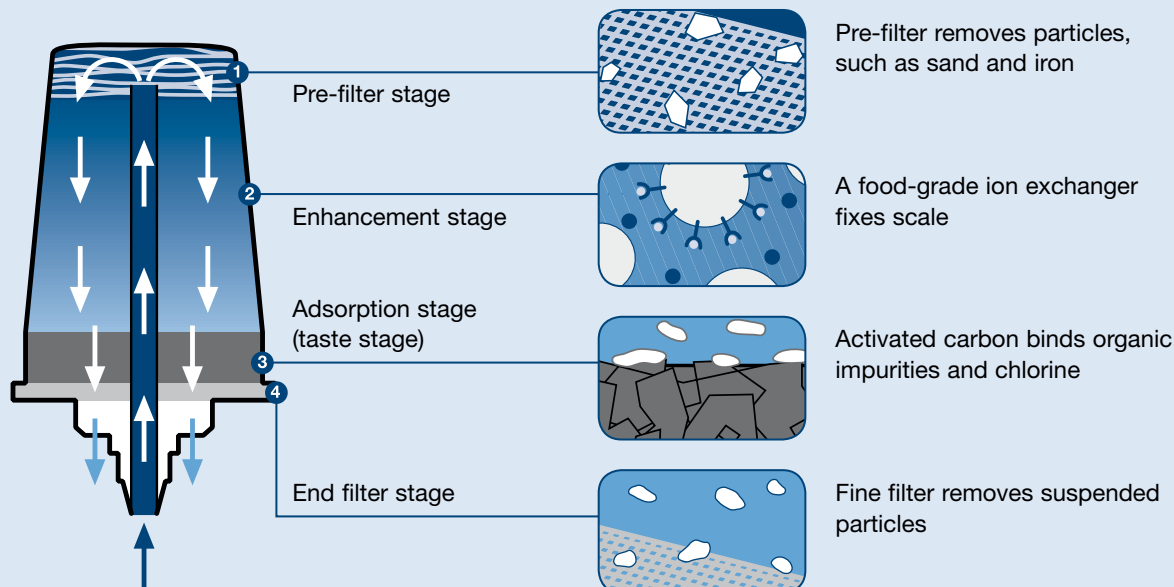

bestcup filter cartridges (1) can be used easily in the tanks of a wide range of coffee and espresso machine via an adapter (2).

A range of adapters are available e.g. for hose (3) or direct connection (4). The water is filtered directly as required (making coffee) and is available right away for your fresh coffee.

## Optimised water for maximum coffee taste

With BWT bestcup filters, optimised water for coffee provides a full, perfect coffee taste and protects your valuable appliances from limescale damage. BWT bestcup filters have a special connector and can be easily placed inside the intake adaptor in the water tanks of coffee machines. The unique water optimisation process, using BWT bestcup professional technology, reduces the amount of hardness minerals (calcium content) and provides clear, particle-free water that will not taint the taste or smell of the coffee. BWT water+more high efficiency technology (HET) makes the whole system extremely efficient. Precious minerals remain in the water, providing the best aroma and a perfect crema.

### The BENEFITS you gain from BWT bestcup professional technology

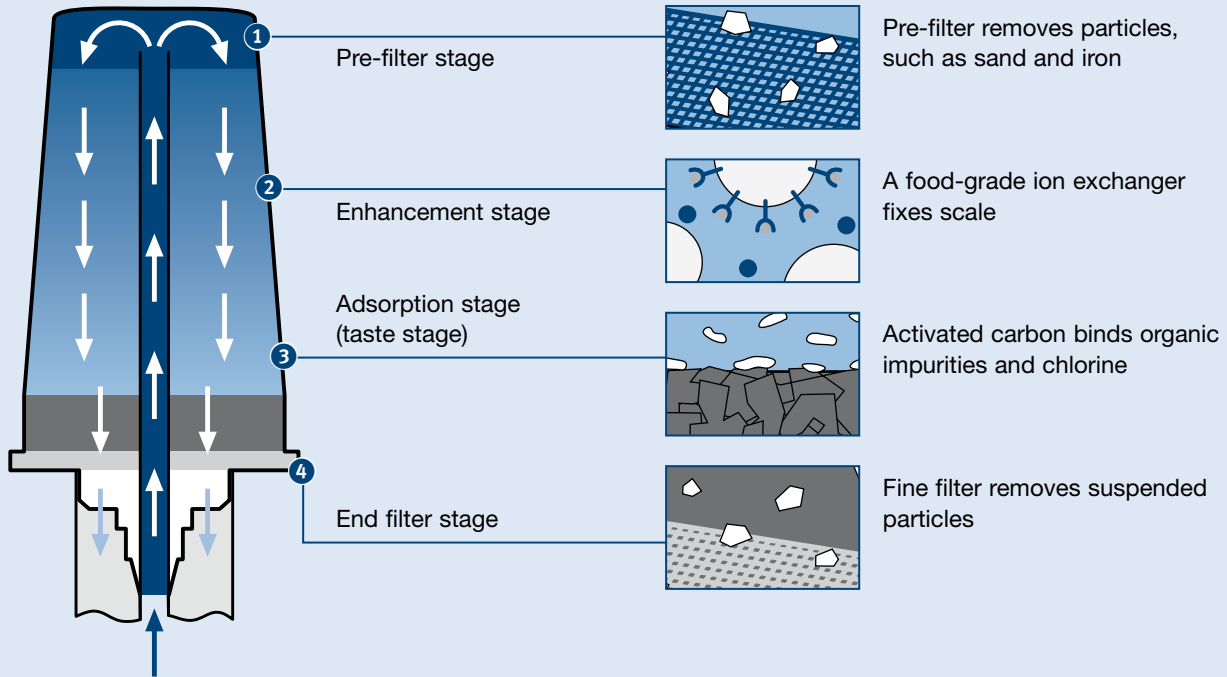

- In the professional sector, high filter capacity for maximum efficiency: 50 litres with 10° hardness minerals
- Guaranteed protection from limescale deposits for all types of water
- Perfect coffee quality, guaranteeing satisfied customers every time
- Easy to operate, and fast filter replacement

BWT bestcup professional technology offers easy handling, total protection for your coffee machine and maximum enjoyment for coffee connoisseurs and espresso lovers alike.
